Inaugural Address

Delivered by the Mayor, Honorable Edward R. B. McGee

To the Honorable Council:

With a feeling of deep appreciation for our citizens we again assume the responsibility of administering the business of this City during the coming year. I desire to take this opportunity to express my sincere thanks for the consideration, kindness, and confidence displayed by the people of Berlin, and I hope that my actions as Mayor will be such as to cause no regrets on the part of any citizen.

Two new members have been elected to the Council this year, D. J. Halle from Ward Two, and Alf Halverson from Ward Three. Both are gentlemen of ability, and I am confident will faithfully represent their constituents; they will prove worthy additions to the Council, and I solicit their cooperation in handling the numerous serious and weighty problems which undoubtedly will confront us during the year.

We are all familiar with the economic conditions of the country at the present time; while other parts of the nation and state have for months been affected by the business depression, Berlin, up to a short time ago, was fortunate in not suffering from such conditions.

But today we are faced with a serious problem, perhaps the most serious that any City Government of Berlin has been confronted with for many years, and I refer to the problem of the unemployed.

Furnishing relief to the large number of men without employment is a solemn duty for us to perform; we must not hesitate or handle the situation in a half-hearted manner. Each and every member of this Council desires to work for the best interests of the community, and realize well that the income to manage a city comes from the people, and the dividends are a well governed municipality, good feeling and prosperity.

With a large number of men out of work, there is no real prosperity, and surely no good feeling.

Some may contend that we have a Department of Poor to take care of the unemployment situation, but there lives not the man or woman who would accept aid from this department, if work of any kind could be obtained. The average citizen does not seek assistance from this source, unless absolutely compelled to so do.

Practically all of the cases now being handled by the department, are thoroughly worthy ones and it is a cause for deep regret that we are operating under a system that compels the officials to publish the names of those assisted; indeed a repulsive and antiquated method. Those who have met with misfortune, either through sickness or unemployment, and thus compelled to seek aid, should not have their names broadcast, and while I appreciate that this is the law, and that this Council has no authority to change it, yet I feel that every member of this Council will join with me in expressing the wish that in the near future the Legislature may in its wisdom alter the situation.

While on this subject, I cannot refrain from expressing my disapproval of the words "Poor Department." The title is another antique that we can well dispense with. I respectfully recommend to the Committee on Ordinances, before completing its work, to submit to the Council an ordinance creating the Department of Public Welfare, to take over all duties of the present Poor Department.

President Hoover some time ago suggested that the states, counties, cities and towns, enter upon a program of public improvements, with a view of relieving the unemployment situation, and I am heartily in accord with that suggestion, and in my recommendations, to be made presently, I have endeavored to bring to the attention of the Council, improvements and construction work that will not only employ a large number of men, and thus relieve in a great measure the unemployment situation, but will be beneficial and advantageous to the City as a whole.

You will pardon me, gentlemen, for having taken up so much time in discussing the matter of unemployment, but, as stated earlier in this address, it is the most serious problem that confronts this administration, and the citizens have the right to expect us to adopt all just, fair, and legal steps that may assist in solving the same.

FINANCES

Finances of the City are in excellent condition, the cash on hand at the end of the fiscal year, being, I believe, the largest in

the history of the City. We are in a position to carry out needed improvements that I shall hereafter mention.

DEPARTMENT OF SCHOOLS

The Junior High School should be enlarged so that additional rooms may be added thereto, thus relieving crowded conditions, the addition should be of such size as to give the school eight or nine extra rooms.

The land and grounds about the various school houses in the City should be improved and made more presentable. I fully appreciate that the members of the school board are doing much to improve conditions in this respect, but considerable more work can be accomplished this year, and funds should be appropriated so that the board may carry on this work, and in so doing many men will be employed.

Through the courtesy and kindness of Mrs. W. R. Brown, a member of the Board, Dr. Strayer of Columbia University, a famous authority on school matters recently made a survey of the school situation here and his report has undoubtedly been read by all. He makes some minor suggestions and the members will undoubtedly carry these out, and I wish to take this opportunity to congratulate the Board of Education upon the condition of the school as disclosed by this report.

FIRE DEPARTMENT

During the administrations of ex-Mayors King and Vaillancourt the equipment of this department was greatly improved and increased, and in consequence the department is now functioning with a higher degree of efficiency. The standing of the department is such that the underwriters have placed Berlin in Class "A," and eventually property owners ought to reap the benefit by further reduction in the insurance rates.

I would recommend that a new pumper be purchased, because in the event of two large fires breaking out at the same time, the department would be greatly handicapped in handling the same. I also recommend the purchase of 500 feet of additional hose.

DEPARTMENT OF PUBLIC WORKS

By carrying on an extensive campaign of public improvements, so necessary in this city, a large number of men can be employed and thus relieve the unfortunate situation to which I have already made reference.

In Ward One I recommend and urge the extension of Pleasant

Street to Glen Avenue, and thus relieve the congested condition of Glen Avenue. In the event that the State of New Hampshire will assist in bearing part of the financial burden, I recommend that the highway from the Gorham town line to Green Square be concreted. The section known as Cascade village, located within the limits of the city should receive attention.

I recommend that Bridge Street be paved and a new sidewalk be constructed and the extension of the surface sewers. Part of this street extends into Gorham, and I feel certain that that town will defray its part of the expense. Williams Street in the same section, should also be paved and a sidewalk constructed and other work carried on in different parts of the village.

In Ward Two, Park Street should be paved and sidewalks constructed. A new street should be laid out on the westerly side of the Berlin Mills Branch of the Canadian National Railway, and constructed so that it will connect with Mason or York Street, providing another route to Hillside Avenue and Wight Street.

Other improvements should be made in different parts of the Ward.

In Ward Three I recommend the laying of waterbound macadam on Norway and Sweden Streets, and the paving, and construction of a sidewalk on Elm Street. An additional surface drain should be constructed between Second and Third Streets on Main Street, to take care of the surface water accumulating thereabouts, and which has become a genuine nuisance to the citizens.

Ward Four should have additional sewers and sidewalks in Blais, Liberty, and Forbush Parks; this section of the City is rapidly growing, and the people are entitled to well paved streets and suitable sidewalks as now enjoyed in other parts of the City. A large surface drain has been laid from Goebel Street to the river which will eliminate flooding, annoyance and damage caused by surface water in the past.

I recommend the extension and paving of Hillsboro Street; likewise the extension of Mason Street should be paved and sidewalks constructed on Rockingham, Carroll and other streets now needing the same; the lower end of Burgess Street should be widened. The upper end of Hutchins Street should be improved, and a sidewalk constructed so that the citizens may use the same in walking to the several cemeteries located in that section.

Last year I recommended the construction of swimming pools

and I repeat that recommendation and suggest that as soon as practical, one be constructed in some section of Ward Three and another in some central part of the City. We owe this to the youth of our municipality.

The steps leading from the public library to the street are anything but ornamental and I recommend that the same be altered or reconstructed with a view of, not only making them more sightly, but eliminating the danger which now confronts one using this institution, as a patron of the library is compelled to step abruptly into the street.

I recommend the erection of suitable signs at the various entrances to the City, giving the tourists ample information concerning the directions and distances to other places. At the present time the City is absolutely devoid of such signs.

If we proceed with the work and construction program which I have referred to it will, I feel certain, greatly relieve the unemployment situation.

POLICE DEPARTMENT

We are all aware that the City Council has nothing to do with the control or management of this department; it is under the control or management of the Board of Police Commissioners, appointed by the Governor and the City Council simply authorizes payment of all bills incurred by this Commission. The department, however, appears to be highly efficient and well managed and I desire to congratulate the governing board thereof.

DEPARTMENT OF POOR

This department was called upon to expend, last year, a greater sum than its appropriation, and owing to present conditions I recommend a larger appropriation for the coming year as there are many worthy cases to be cared for and we are under a moral and legal obligation to properly care for those afflicted with misfortune. I repeat my suggestion that the name of this department be changed.

WATER WORKS

During the past year the water department made many substantial and permanent improvements. Following out my recommendation, a new high pressure main is being laid on Ramsey Hill which will be carried to completion during the coming year. This main was laid at heavy cost but it eliminates the pumping station in that section of the City and will furnish better water and fire protection to the residents.

A new main water pipe was laid across the Androscoggin River to the East Side at the expense of \$17,000. In the past only one water pipe extended to that section of the City and last summer, for a period of about ten hours, it was rendered useless during a break and the citizens of Ward Four were without water and fire protection for that period. This makes two direct lines running to the East Side and will provide better service and fire protection, and ought to result in a reduction of fire insurance rates.

At this time I recommend the enlargement of the reservoir. During the construction of the main to Ramsey Hill, sewers were laid at the same time and I recommend that this method be carried out in different sections of the City. A new main water pipe is being laid on Third Avenue from Wight Street to Mt. Forist Street, down the latter street to First Avenue and Clarke Street. This will greatly increase the water pressure and give residents in that section better service. The water department will receive no increase in revenue from the above mentioned improvements.

AIRPORT

Aviation has reached a stage which should compel every city to lay out and maintain a suitable airport and I recommend that the necessary work be done to complete the field and airport and give Berlin an airport of which its citizens may feel proud.

ORDINANCES

Last year the City Council voted to revise its ordinances, some of which have been in existence for 33 years and are antiquated and I believe were never made with the intention of having them in force under present day conditions. Every city in the State except Berlin has, within the past three or four years, revised and compiled its ordinances in book form so that they may be readily accessible to every citizen. Some of those in force in this City have never been printed.

The Committee on Ordinances has spent much time during the past year in endeavoring to produce a set of ordinances that will meet with the approval of the entire council; it has been a long and tedious work and much credit is due this committee and to each member of the council for the careful consideration given such a serious task. The work is not completed and I recommend that it go forward until the desired ends have been met.

ZONING COMMISSION

Practically every city in the State has what is called a Zoning Ordinance, authorized by an act of the legislature; Berlin is one of the last municipalities in New Hampshire to take advantage of this act. Some time ago the City Council voted to appoint a Zoning Commission to make a survey, study the situation, hold public hearings and make a report thereon. The Commissioners appointed are able men who have the interests of the City at heart and I ask the citizens and property owners to cooperate with this commission and I feel certain that when this matter is more thoroughly understood, we will all realize that it is for the betterment of Berlin.

CONCLUSION

Many of the numerous matters, recommendations and suggestions which I have called to your attention will, if carried out, provide employment, aid in creating a better feeling and ultimately be to the greater advantage of our citizens.

During the past year the members of the Council have been extremely courteous, giving freely of their time for the benefit of the City, without regard to political affiliation and I know that during the coming year they will again strive to do everything possible for the City, which has honored them.

EDWARD R. B. McGEE, Mayor.

Orders

In the year of our Lord one thousand nine hundred and thirty.

An order to Twin State Gas & Electric Company.

Ordered, by a vote of the City Council taken February 4th, 1930, that the following lights be placed:

80 c. p. on School Street at the corner of Success Street.

In the year of our Lord one thousand nine hundred and thirty.

An order to Berlin Water Works.

Ordered, by a vote of the City Council taken May 6th, 1930, that the following hydrants be placed:

One on Third Avenue in front of the new school.

One on Russian Street at the end of the pipe extension.

H. M. MOFFETT,

City Clerk.

H. GOSSELIN,

Chairman Committee on Fire Department.

In the year of our Lord one thousand nine hundred and thirty.

An order to H. J. Monahan, Fire Chief.

Ordered, by a vote of the City Council taken May 6th, 1930,

that fire alarm boxes be placed at the following locations:

On the south end of Burgess Street on pole No. 27.

On the southerly end of Champlain Street near the residence of Jos. Gallant on pole No. 18.

On First Avenue near the residence of Charles Armstrong on pole No. 31.

H. M. MOFFETT,
City Clerk.

H. GOSSELIN,
Chairman Committee on Fire Department.

In the year of our Lord one thousand nine hundred and thirty.

An order to H. J. Monahan, Fire Chief.

Ordered, by a vote of the City Council taken June 17, 1930, that a fire alarm box be placed at the corner of School and Success Streets.

H. M. MOFFETT,
City Clerk.

H. GOSSELIN,
Chairman Committee on Fire Department.

Resolutions

In the year of our Lord one thousand nine hundred and thirty.
A RESOLUTION to raise money in anticipation of taxes.

Resolved by the City Council of the City of Berlin as follows:

That a sum of money not exceeding four hundred thousand dollars be raised by a loan or loans for the purpose of paying the current expenses of the various departments of the City in anticipation of taxes for the Municipal year A. D. 1930; to be paid from the taxes of said year; and that the City Treasurer be and he is hereby authorized to give the note or notes of said City not exceeding in the aggregate said amount.

Passed May 27th, 1930.

Approved,

EDWARD R. B. McGEE,

Mayor.

Attest:

H. M. MOFFETT,

City Clerk.

In the year of our Lord one thousand nine hundred and thirty.
A RESOLUTION authorizing the issue of serial bonds of said City to the amount of two hundred thousand dollars (\$200,000.00).

Resolved by the City Council of the City of Berlin as follows:

That there be appropriated for the purpose of public school improvements the sum of two hundred thousand dollars (\$200,000.00). Be it further resolved that the City Treasurer be and he is hereby authorized to borrow said sum of two hundred thousand dollars (\$200,000.00) and for that purpose that the bonds of said City be issued to the extent of two hundred thousand dollars (\$200,000.00) under the "Municipal Bonds Act of 1895" and acts amendatory of and in addition thereto.

Said bonds shall be dated July 1, 1930, to be in coupon form payable to bearer, maturing ten thousand dollars (\$10,000.00) on July 1st, 1931, and ten thousand dollars on the first day of July of each of the years 1932 to 1951 inclusive.

Each annual payment to be divided into bonds of ten thousand dollars each, principal and interest to be payable at Old Colony Trust Company, Boston, Mass., and none of said bonds to be obligatory without the authenticating certificate of said Old Colony Trust Company endorsed thereon. The bonds shall bear the seal of said City, to be signed by the Mayor and countersigned by the City Treasurer and bear interest at the rate of not more than five (5) per cent. per annum, payable semi-annually. The coupon attached to said bond shall bear the facsimile signature of the City Treasurer.

Further particulars as to the form, issuance and sale of said bonds to be determined within legal requirements by the City Treasurer subject to the approval of the Finance Committee.

The proceeds of said bonds in the amount specified shall be applied solely for the purposes designated.

That for the purpose of providing payment of the principal and interest of said bonds there shall be raised by taxation each year sums sufficient to pay said principal and interest each year until said bonds are paid in full.

Passed June 17, 1930.

Approved,
EDWARD R. B. MCGEE,
Mayor.

Attest:

H. M. MOFFETT,
City Clerk.

In the year of our Lord one thousand nine hundred and thirty. A RESOLUTION amending a resolution passed June 17, 1930, authorizing the issue of serial bonds of said City to the amount of \$200,000.00.

Resolved by the City Council of the City of Berlin as follows:

That the resolution passed June 17, 1930, in substance appropriating the sum of two hundred thousand dollars (\$200,000.00) for Public School Improvements and authorizing the issuance of \$200,000 bonds of the City in said sum, be amended by inserting

therein after the words "Public School Improvements" the words "addition to Bartlett School, addition to Junior High School and purchasing of property by eminent domain for room for addition to Junior High School," by striking out the words "Municipal Bonds Act of 1895" and substituting the words "Municipal Bonds Statute," by striking out the figure "1951" and inserting in place thereof the figures "1950," by striking out the word "ten" and inserting in place thereof the word "one"—said resolution in other respects not inconsistent herewith and all acts done or performed under authority thereof being hereby ratified, confirmed and approved.

Passed July 1, 1930.

Approved,

EDWARD R. B. McGEE,

Mayor.

Attest:

H. M. MOFFETT,

City Clerk.

In the year of our Lord one thousand nine hundred and thirty. A RESOLUTION appropriating money to defray the expenses of the different departments of the City Government for the fiscal year ending January 31st, 1931.

Resolved by the City Council of the City of Berlin as follows:

That the sum of seven hundred fifty three thousand two hundred twenty-one dollars and fifteen cents (\$753,221.15) be raised by tax on polls and estates liable to be taxed in said City to defray the expenses of the different departments of the City Government for the fiscal year ending January 31st, 1931.

In the year of our Lord one thousand nine hundred and thirty.
A RESOLUTION authorizing the issue of Water Improvement
Bonds in the amount of \$25,000.

Resolved by the City Council of the City of Berlin as follows:

That under authority of and in compliance with New Hampshire Laws 1925, Chapter 295 entitled "An Act Authorizing the City of Berlin to Acquire, Construct, Manage and Own Water

Works" and for the purpose of raising funds to acquire by purchase or otherwise the property, rights and privileges within and outside of the city, of Berlin Water Company, Incorporated, and for the construction of new filter beds and water improvements and extensions, the City Treasurer be and he is hereby authorized to borrow the sum of twenty-five thousand (\$25,000) dollars for the purpose of constructing a new high pressure main.

And the Mayor and City Treasurer are hereby authorized to issue under the seal of the city bonds for the said amount of \$25,000 at 4½% interest payable semi-annually June 15 and December 15. Said bonds to be serial bonds in coupon form, principal payable as follows:

\$2,000-payable annually from Dec. 15, 1931, to Dec. 15,	
1935, inclusive	\$ 10,000.00
\$3,000 payable annually from Dec. 15, 1936, to Dec. 15,	
1940, inclusive	\$ 15,000.00

The principal and interest of said bonds to be payable at the First National Bank of Boston, Mass., and shall bear the City seal, shall be signed by the Mayor and countersigned by the City Treasurer, and shall bear interest at the rate not exceeding 4½ per cent. per annum payable semi-annually. The coupons annexed to said bonds shall bear the facsimile signature of the City Treasurer. None of said bonds shall be obligatory without the certificate of said First National Bank signed thereon. Other particulars as to the form, issuance and sale of said bonds not inconsistent with legal requirements shall be determined by the City Treasurer subject to the approval of the Finance Committee.

For the purpose of providing for the payment of principal and interest of said bonds accruing each year, there shall be raised by revenue from said Water Works, funds sufficient to pay said principal and interest each year until said bonds are paid in full.

Passed December 9, 1930.

Approved,

EDWARD R. B. McGEE,

Mayor.

Attest:

H. M. MOFFETT,

City Clerk.

Department Reports

Assessors' Report

Berlin, N. H., January 31, 1931.

Report of Library Trustees

To His Honor, the Mayor, and City Council of the City of Berlin :

Our yearly report, together with the Treasurer's Report, and Librarian's Report is herewith submitted:

We wish to call your attention to the amount of money spent on permanent improvements during the past year. A much needed floor was laid in the adult department and was paid for out of our appropriation. Without doubt it will be necessary to spend much more on improvements in the years to come.

The Reading and Reference Rooms and also the Juvenile Department are over-crowded daily and each year are becoming more inadequate to meet the needs of our community. Because of poor heating facilities, in winter the building is poorly ventilated and badly heated. A new heating system must be installed at once.

Because of these improvements and because of the crying need of our citizens for good literature, we respectfully request that our appropriation be increased to \$11,000 to take care of the necessary expenditures for the ensuing year. We also request that some action be taken in the matter of a new building for the Adult Department, allowing the old building to be used as a Children's Library.

During the past year we have suffered a severe loss in the passing of William Wilson Burlingame, one of our trustees, a zealous worker in the interests of the Library and the welfare of the city.

Respectfully submitted,

MARGARET PINGREE,

CLAIRE J. BAILEY,

Board of Trustees.

Librarian's Report

To the Board of Trustees of the Berlin Public Library:

The thirty-eighth annual report of the Librarian is herewith submitted:

I wish to call your attention to the circulation statistics which show an increase of 8,100 volumes over the books loaned from the library in 1929. The steady increase in book circulation entails, of course, more routine work and necessitates more work being done outside of library hours. It is more evident each year that the library is under-staffed.

1,283 new borrowers were registered in 1930, and this is the largest registration ever reported.

Children's Book Week was especially successful this year, and we are deeply grateful to the schools for their splendid cooperation which made this program possible. The program at the City Hall, which was held for the adults, was very well attended, and we hope to make an adult program a feature of our future Book Week Celebration. The results of our book week program have been especially gratifying, showing a sustained increase in the circulation of children's books and added interest in the library.

The Library Leaflet, which made its tentative appearance in August, has become a standing feature in the library's activities and has made many friends among our readers. Much favorable comment has been received for the Leaflet. I wish to thank all our patrons who have contributed articles.

The cleaning and renovating of the Library interior adds much to the attractiveness of our building. We hope that our readers will continue to patronize the library and we again assure them of our desire to give them adequate, cheerful and courteous service.

Respectfully submitted,

AGNES SLOANE,
Librarian.

Fire Department

To His Honor, the Mayor, and City Council of the City of Berlin:

Gentlemen: I have the honor of submitting herewith the annual report of the Fire Department of the City of Berlin for the year ending December 31st, 1930.

During the year we received and answered calls from Gorcham on three occasions.

In our own district we answered 226 still alarms, 49 bell alarms, making a total of 278 alarms, 10 of this number found false or unnecessary.

In answering these alarms we traveled 312.1 miles, worked 137 hours and 42 minutes, used 24,275 feet of 2½-inch fire hose, 21,950 feet of chemical hose, 2,998 feet of ladders, 437 gallons of chemical, 6 gallons of Foamite and 6,435 gallons of water with booster pump.

The fire loss for the year was \$53,543.63 on buildings, and \$8,281.35 on contents, or a total of \$61,824.98.

In July of this year a new pumper of 1,000 gallons capacity was added to the department. This pumper is equipped with special equipment found necessary and is proving a big asset to the department.

The present fire alarm system, installed twenty-five years ago, is becoming inadequate to supply the alarm system of today. I wish to recommend the purchase of modern apparatus to care for the future needs of this city. The alarm system should be extended each year and it is impossible to do so with the apparatus now in use.

A statement in detail of all fires for which damage was claimed follows, with the names of owners and occupants.

In closing, I wish to express my thanks to the Mayor, City Council, Fire Committee and residents of Berlin for the many favors and courtesies shown me in the performance of my duties.

Respectfully submitted,

H. J. MONAHAN,
Chief Engineer.

REPORT OF FIRES

Jan. 4. 2 story brick garage and apartments. Owned by P. Lemieux. Occupied by H. Capen and E. J. Fortier. Value of building \$10,000.00. Insurance upon \$7,500.00. Damage \$459.08. Value of contents owned by E. J. Fortier \$1,500.00. Insurance upon \$1,000.00. Damage 100.00. Cause of fire, overheated smoke pipe on furnace.

Jan. 14. 3 story wood apartment. Owned by Mrs. Young. Occupied by various parties. Value of building \$35,000.00. Insurance upon \$25,000.00. Damage \$50.00. Value of contents owned by H. Beaulac \$1,500.00. Insurance upon \$1,000.00. Damage \$15.00. Cause of fire, defective water heater.

Jan. 15. 3 story wood store. Occupied by J. M. Dresser. Value of contents \$7,500.00. Insurance upon \$3,000.00. Damage \$6.00. Cause of fire, pipe left burning in coat pocket.

Jan. 26. 3 story brick apartments. Owned by A. Berube. Occupied by same and others. Value of building \$20,000.00. Insurance upon \$6,000.00. Damage \$25.00. Cause of fire, dirty chimney.

Jan. 28. 2 story brick store. Owned by J. J. Newberry Co. Occupied by same and others. Value of building \$50,000.00. Insurance upon \$39,000.00. Damage \$21,659.00. Value of contents \$10,000.00. Insurance upon \$1,000.00. Damage \$240.63. Value of contents owned by H. Margolin \$8,000.00. Insurance upon \$3,500.00. Damage \$3,183.80. Cause of fire unknown.

Jan. 23. 2 story wood residence. Owned by A. Bergeron. Occupied by same. Value of contents \$1,500.00. Insurance upon \$1,000.00. Damage \$20.00. Cause of fire, candle left burning.

Jan. 26. 2 story wood residence. Owned by by Mrs. David Walsh. Occupied by same. Value of contents \$2,000.00. Insurance upon \$1,800.00. Damage \$25.00. Cause of fire unknown.

Jan. 27. 2½ wood tenement owned by E. Gemmitti. Occupied by various parties. Value of building \$9,000.00. Insurance upon \$3,000.00. Damage \$21.75. Cause of fire, dirty chimney.

Jan. 28. 3 story brick bank. Owned by Berlin Savings Bank & Trust Co. Value of building \$60,000.00. Insurance upon

\$35,000.00. Damage \$2,063.04. Value of contents \$8,000.00. Insurance upon \$2,000.00. Damage \$277.55. Cause of fire, exposure from Newberry fire.

Jan. 28. 3 story wood store and office building. Owned by J. J. Newberry. Occupied by various parties. Value of contents owned by Polly Prim Shoppe \$2,000.00. Insurance upon \$700.00. Damage \$146.00. Value of contents owned by M. L. St. Pierre \$2,000.00. Insurance upon \$600.00. Damage \$144.37. Value of contents owned by L. L. Freedman \$3,000.00. Insurance upon \$1,500.00. Damage \$441.00.

Jan. 28. 2 story brick store. Owned by Ulric Duval. Occupied by same. Value of contents \$9,000.00. Insurance upon \$7,500.00. Damage \$62.10. Cause of fire, exposure from Newberry fire.

Feb. 6. 3 story wood tenement. Owned by Mrs. Kolinsky. Occupied by same and others. Value of building \$12,000.00. Loss on building \$7,725.00. Insurance upon \$8,300.00. Value of contents owned by Mrs. Mary Gonya \$1,000.00. Insurance upon \$800.00. Damage \$800.00. Cause of fire, defective chimney.

Feb. 6. 1½ story tenement. Owned by E. Barbin. Occupied by tenant. Value of building \$1,500.00. Insurance upon \$1,200.00. Damage \$69.00. Cause of fire, defective chimney.

Feb. 7. 1½ story residence. Owned by Louis Gregoire. Occupied by William Garrety. Value of building \$3,000.00. Insurance upon \$2,000.00. Damage \$25.00. Value of contents owned by William Garrety \$1,200.00. Insurance upon \$1,000.00. Damage \$50.00. Cause of fire, thawing water pipe with torch.

Feb. 9. 2 story tenement. Owned by A. Abelli. Occupied by tenants. Value of building \$5,000.00. Insurance upon \$4,100.00. Damage \$499.30.

Feb. 14. 2 story residence. Owned by William Martin. Occupied by same. Value of building \$4,000.00. Insurance upon \$3,250.00. Damage \$10.00.

Feb. 16. 1 story wood shed. Owned by Fred Hodgdon. Value of building and contents \$20,000.00. Insurance upon \$17,750.00. Damage \$11,079.75. Cause of fire unknown.

Feb. 16. 2 story wood carpenter shop. Owned and occupied by Richards & Lessard. Value of contents \$2,000.00. Insurance upon \$1,000.00. Damage \$61.78. Cause of fire, exposure from Hodgdon fire.

Feb. 27. 2½ story wood school. Owned and occupied by St. Regis School. Value of building \$15,000.00. Insurance upon \$11,000.00. Damage \$61.44. Cause of fire, sparks from the chimney.

March 2. 2½ story wood tenement. Owned by Mrs. C. R. Lebreton. Occupied by tenants. Value of building \$6,000.00. Insurance upon \$2,500.00. Damage \$11.38. Cause of fire, dirty chimney.

March 9. 2 story wood residence. Owned and occupied by A. Mortensen. Value of building \$5,000.00. Insurance upon \$4,000.00. Damage \$50.00. Cause of fire, children playing with matches.

March 14. 2½ story wood tenement. Owned by William Hebert. Occupied by same and others. Value of building \$6,000.00. Insurance upon \$3,000.00. Damage \$247.00. Cause of fire, defective chimney.

March 17. 3 story wood tenement. Owned by H. A. St. Laurent. Occupied by tenants. Value of building \$8,000.00. Insurance upon \$5,000.00. Damage \$71.88. Cause of fire, careless smoker.

March 17. 3 story wood tenement. Owned by Louis Falardeau. Occupied by same and others. Value of building \$6,000.00. Insurance upon \$4,000.00. Damage \$40.50. Cause of fire, dirty chimney.

March 23. 1 story wood hen house. Owned by A. Desilets. Value of building \$1,500.00. Insurance upon \$1,200.00. Damage \$246.26. Cause of fire, overheated stove.

March 26. 2 story wood storehouse. Occupied by Murray Stein. Value of contents \$1,500.00. Insurance upon \$1,000.00. Damage \$35.00. Cause of fire, oil stove.

March 30. 2 story brick store and office building. Owned by P. E. Beaudoin. Occupied by L. P. Beaudoin. Value of contents

owned by L. P. Beaudoin \$1,500.00. Insurance upon \$1,000.00. Damage \$25.00. Cause of fire, careless smoker.

April 4. 2 story residence. Owned by A. Tombs. Value of contents \$1,000.00. Insurance upon \$700.00. Damage \$5.00. Cause of fire, electric iron.

April 9. 3 story wood tenement. Owned by H. Abramson. Occupied by tenants. Value of building \$5,000.00. Insurance upon \$4,000.00. Damage \$40.00. Cause of fire, children playing with matches.

April 16. 2½ story wood residence. Owned and occupied by J. Croteau. Value of building \$8,000.00. Insurance upon \$5,000.00. Damage \$32.00. Cause of fire, dirty chimney.

April 21. 1½ story wood residence. Owned by Guardian Angel Church. Occupied by tenant. Value of building \$3,000.00. Insurance upon \$1,500.00. Damage \$15.83. Cause of fire, dirty chimney.

May 1. 2 story wood residence. Owned and occupied by Joseph Perry. Value of building \$4,000.00. Insurance upon \$3,000.00. Damage \$20.05. Cause of fire, lightning.

Respectfully submitted,

I. E. ST. PIERRE,
Building Inspector.

Report of Police Commission

Berlin, N. H., January 31, 1931.

To His Excellency, the Governor of the State of New Hampshire,
His Honor, the Mayor, and the City Council of the City of
Berlin :

In accordance with the provisions of Chapter 160, Session Laws of 1905, as amended by Chapter 198, of the Session Laws of 1913, we submit our annual report.

The activities of the Police Department for the past year as shown by the City Marshal's report, have been of the usual character. The officers have been diligent and have co-operated with the other law enforcement officers of the County and State and also the Federal Officers.

Two regular officers were added to our force during the past year, making the total number 23 and one Police Matron.

During the past year all of the streets were marked under the supervision of this department in accordance with the provision of the ordinances passed by the City Council.

Appropriation

Owing to the continual increase in the cost of administrating this department it is imperative that a larger appropriation be made for defraying the expense of same.

Police Commissioners

The Police Commissioners are appointed by the Governor, one each year, for a period of three years, with a salary of \$350.00 a year to be divided at the discretion of the Commissioners. The term of each member expires as follows:

Dr. Julius Stahl, September 30, 1931.

Perley W. Churchill, September 30, 1932.

Edward J. Toussaint, September 30, 1930.

Beat No. 1—Berlin Mills, from Eighth Street to Ste. Anne's Church.

Beat No. 2—From Ste. Anne's Church to Stahl-Clarke's Store.

Beat No. 3—From Stahl-Clarke's Store to Grand Trunk Station, and lower Main Street, opposite the I. P. Co. as far as the Grand Trunk crossing.

Beat No. 4—Pleasant Street.

Beat No. 5—East Side, Boston & Maine Railroad Station and Mason Street.

Patrol covers all sections of the City both day and night.

Respectfully submitted,

JULIUS STAHL,
P. W. CHURCHILL,
E. J. TOUSSAINT,

Police Commissioners.

Police Department

REPORT OF CITY MARSHAL

Report of Superintendent

To the Board of Education :

The building program initiated by the Board during the past summer is nearing completion. The problem which now confronts us is to so use these additional facilities as to make available to the children of this community the widest possible range of educational opportunities consistent with reasonable economy.

Such an investment in school buildings must depend very largely for its justification on the fact that :

1. It will enable the schools to do better the things they are already doing.
2. It will make possible activities and opportunities not otherwise possible.

THE BARTLETT ADDITION

The four-room addition to the Bartlett School has made it possible to house in that building practically all the children in the elementary grades who live in the section south and west of the Grand Trunk Railway. The new rooms are attractive in appearance, well lighted, and well furnished. The two fire-proof stair-wells provide a safe means of escape from the building in case of fire. In a building which is not in itself fire-proof this is extremely important.

This building is already comfortably filled, and it is possible that within a year or two it may be necessary to find other accommodations for the sixth grade children. The grades now housed in the building are as follows :

First Grade	2
Second Grade	2
Third Grade	2
Fourth Grade	1
Fifth Grade	2
Sixth Grade	1

One fourth grade was shifted from the Marston School, and two fifth grades and a sixth grade were transferred from the

Junior High School building. The plan of departmentalized instruction which was in operation in the grades formerly housed in the Junior High School building is being continued at the Bartlett School. Under this plan each teacher specializes in one or two subjects and teaches her particular subject to a number of different grades, instead of teaching the whole program of studies to a single grade. This plan has the advantage of enabling the teacher to become more expert in her work, since it is limited to one or two subjects. It also eliminates to some extent the duplication of equipment, since, for example, maps, globes, and reference material for the teaching of geography need be provided only for the teacher of geography instead of for each class. With a smaller expenditure of money, each pupil can have the advantage of better equipment and more adequate reference material than under the traditional grade organization.

The advantages resulting from the addition to the Bartlett School may be summarized as follows:

1. It permits the elementary grade children of the south-west section of the city to attend a school in the neighborhood of their homes.
2. It affords an opportunity for a type of organization not deemed feasible in the other buildings, due to their size and the grades housed.
3. It releases rooms in the Junior High School building needed to meet the demands resulting from the growth of the junior and senior high schools.

The grounds of the Bartlett School are the largest in the city. Aside from their nearness to the railroad tracks, they are ideally located for playground use. With a comparatively small expenditure the grounds in the immediate vicinity of the building could be beautified and a fine playground provided. Any danger due to the proximity of the railroad tracks could be eliminated by enclosing the grounds with a fence. There seems to be no reason why the children of this section should be forced to play in the streets when space is available where they might play in safety.

THE JUNIOR HIGH SCHOOL ADDITION

In common with other cities of the United States, Berlin has experienced a rapid growth in high school enrollment in the past few years. At the time it was erected, the Senior High School building was considered large enough to meet the needs for many

years to come. However, the increase in enrollment exceeded all expectations. In the last four years this increase has been more than 30 per cent. At the present time the enrollment in the Senior High School is in excess of the capacity of the building, as originally estimated.

The design of the Senior High School building is such as to make the addition of classrooms extremely difficult. Consequently, last spring, when the Board decided that additional rooms must be provided, they very wisely chose to increase the capacity of the Junior High School building rather than to risk marring the Senior High School building in an attempt to increase its capacity.

The addition includes two classrooms, a music room, an art room, two shops, and a gymnasium. These rooms, with the addition of five rooms made available by moving elementary classes out of the building will make it possible to house the ninth grade in the Junior High School building. Instead of the present organization of a two-year junior high school and a four-year senior high school, this will give us a three-year junior high school and a three-year senior high school, a form of organization which is becoming increasingly popular.

The reduction in enrollment, due to the removal of the ninth grade, should enable us to take care of senior high school growth for some years to come. In the meantime, there will be less crowding and classes can be more comfortably housed.

The new gymnasium will make it possible to give instruction in physical education and provide a program of games and sports for the pupils of the junior high school. It will permit, also, the extension of this work in the senior high school. In the interests of physical and mental health the schools should develop in every child physical efficiency and a love for healthful recreation. This phase of our work has, in the past, been handicapped by the absence of proper facilities. While we shall still be handicapped, to some extent, by the lack of sufficient space for outdoor sports, it will be possible to do a great deal more than in the past.

I know of no other school system the size of Berlin's which offers nowhere in the elementary grades or in the high school any systematic instruction in art. It seems to me that we are guilty of a serious omission if we fail to attempt to awaken and develop the creative power latent in our pupils.

The modern school teaches art, not alone for its vocational

possibilities, but for its avocational and cultural values as well. Not every person can become an artist, but all of us need to know something of color harmony, grace, and beauty, not only as applied to pictures and statuary, but we need, as well, to cultivate good taste in clothes, architecture, furniture and other familiar objects of everyday life.

In the elementary grades we are doing some work in sketching, water colors, and clay modeling, but the amount and quality of such work depends on the interest and ability of the individual teachers. In the junior and senior high schools an effort is made to stimulate an interest in art by means of art clubs and incidentally, in the printing classes. Some excellent work has been produced, but systematic instruction under an expert teacher is needed if the maximum of artistic development of the pupils is to be achieved. The art room included in the addition to the Junior High School provides a much needed addition to our classroom facilities.

Berlin can well be proud of what has been accomplished in the field of public school music. The musical talent of a large number of pupils are being developed in the various orchestras, bands, and choruses. The work in music in the Junior High School has been handicapped by the lack of a room designed to accommodate more than a small chorus or orchestra. The new music room will accommodate choruses of considerable size and will afford seats for the orchestra more comfortable than the desk tops which are now used. Then too, the room will be available for music classes at all hours of the school day.

The close proximity of the Junior and Senior High School buildings to each other, together with the fact that in inclement weather pupils may pass from one building to the other through the gymnasium, will make it possible to use such special rooms as shops, sewing rooms, art rooms, etc., in one building for the instruction of classes from both schools. This will make possible a considerable saving through the avoidance of duplication in the matter of classrooms and equipment.

The actual construction work has been carried out at an expenditure considerably less than would have been necessary at any previous time in the last ten years. In all probability, we shall not soon again be able to secure such an advantageous price on building construction.

Briefly, the addition to the Junior High School building enables us:

1. To relieve the congestion in the Senior High School and leave room for expansion for some years to come.
2. To organize the Junior High School as a three-year school.
3. To provide regular work in physical education for the Junior High School pupils and to extend this work in the Senior High School.
4. To offer instruction in the graphic and plastic arts to pupils of both the junior and senior schools.
5. To devote more time to music in the Junior High School and to give such instruction under better conditions.
6. To economize on classroom space and equipment for shop and special class work.
7. To provide for our plant needs at a time when construction costs are low.

The change from a two-year to a three-year junior high school will make possible the introduction of some of the features of a modern junior high school not heretofore offered. During the past months the members of the staff have been working on a reorganization of the program of studies for the junior and senior schools in an effort to develop an integrated program through the Senior High School which will be at the same time comprehensive and economical. This will be presented to the Board later as a separate report. The reports of Headmaster MacLean and Principal Amstutz will, however, touch on certain phases of this matter.

FRANK C. KETLER,
Superintendent of Schools.

January 31, 1931.

Report of Junior High School Principal

To Superintendent Frank C. Ketler:

In making this, my initial report as principal of the Berlin Junior High School, I want first to express to you and to Mr. MacLean my heart-felt appreciation for the many ways in which you have aided in my orientation. I wish also to acknowledge publicly my debt to the teachers and to other members of the staff for the splendid spirit of cooperation which they have shown in every school enterprise. Whatever our success in attaining the objectives of the junior high school will be due primarily to this eagerness on the part of teachers and principal to share responsibility in the administration of the school and to work happily together toward a common goal.

Any institution, if it is to pay dividends, must direct its energies toward the satisfaction of felt needs. Education, as a public institution, is a long term investment by society to perpetuate itself and promote its interests; it is a long term investment to make this a better place in which to live and in which to make a living. It is based on a firm conviction that society derives benefit largely as the needs of the individual are met. What is good for the individual is good for the state.

The junior high school came into being and has reached its present status as a result of studied attempts on the part of society to satisfy more adequately than was possible under the traditional eight-four plan the needs of children from twelve to sixteen years of age.

All pupils, prior to their entrance into the junior high school, have passed through a period of training in the elementary school. There they have been furnished the common training necessary for all children in a democracy "regardless of sex, social status, or future vocation." Society demands that all of its members know how to speak, read, and write the vernacular; that all acquire certain skill in the fundamentals of arithmetic; that there

be developed common favorable attitudes toward the various phases of democratic government, individual rights and responsibilities, religious freedom, public health, monogomy, and the like. The elementary school curriculum includes only those subjects that are believed to be essential to all.

In the junior high school, however, we find three more or less distinct groups for which provision must be made; (1) those who can, and in all probability will, persist at least through high school; (2) those who intend to withdraw from school and enter upon work at, or shortly after, the age when the law releases them from compulsory attendance; and (3) those whose stay is for one reason or another highly uncertain.

If it were possible to determine with any reasonable degree of certainty, early in the junior high period, into which group each pupil would eventually fall, the problem of differentiated education would be relatively simple. For all pupils the school would seek the main objectives of education (health, command of the fundamental processes, worthy home membership, vocation, citizenship, the worthy use of leisure, and ethical character). For the first group the school would enrich the curriculum and accelerate progress; for the second, it would provide every possible aid in the choice of vocation and furnish training, so far as it was able, in the one chosen; for the third, it would provide such materials of instruction as would be of maximum value to the extent pursued, and would put forth every effort to retain each pupil in school as long as he could profit by it.

Unfortunately, no technique has as yet been devised whereby we can predict into which group each pupil will fall. And if such were possible it would prove relatively ineffective in a society such as ours that demands for each individual the right to follow the career of his own choosing and the freedom to transfer from one line of work to another as each in turn proves attractive. Compliance with these demands has frequently resulted in much profitless work and many cases of maladjustment. Many boys and girls who have capacity to do high school and even college work withdraw from school at the age of sixteen and enter upon work with little knowledge of the social and economic limitations in their chosen fields; others, entering the high school, sample one curriculum after another, finally leaving in large numbers with inadequate training for social and industrial life; others persist on studies for which they are ill-adapted and in which they have a minimum amount of success.

If the junior high school is to satisfy the needs of these individuals (and of society) it must, among other things, give them a variety of worth-while experiences and opportunities in many lines of endeavor through which it can explore their interests, aptitudes, and capacities, and discover for them and for their parents the highest fields of work in which they can most certainly hope to achieve success and happiness.

The curriculum now offered in the Berlin Junior High School meets in a large measure the general needs of the boys and girls enrolled. English, arithmetic, and history, all of which are started in the elementary school, are continued throughout the seventh and eighth grades. General science and junior business training are offered in the seventh and eighth grades respectively. All pupils receive training in the practical arts (woodworking for boys; cooking and sewing for girls), in music and in health. In these limited fields, largely academic, the pupils are receiving thorough training by a staff of teachers well-grounded in their subject-matter and in methods of teaching.

The tone and life in a junior high school are measured to a great extent by the extra-curricular work and after-school activities which exist in that school. Too much recognition and praise cannot be given to the teachers in the Berlin Junior High School for conducting this work which is purely voluntary. Before and after school and during the noon recess teachers spend a great deal of time sponsoring club activities, preparing assembly programs, and coaching pupils who have missed work because of absence. Next year it is hoped that time for these activities will be provided in the regular school schedule.

Because of lack of special equipment and specially trained teachers exploratory courses are not now offered in the junior high school; moreover, to carry this exploratory work through to the end requires three years. With the completion of the six-room addition to the junior high school building it will be possible to transfer the ninth grade from the senior to the junior high school giving us a three year school in keeping with the trend in the country at large. The addition of shop, laboratory, music, and art equipment provided in the building program will make possible the inclusion in the curriculum of an adequate exploratory program.

It is unfortunate that no provision is being made for library facilities in our building program. At the present time our library, providing for the needs of nearly four hundred pupils,

consists of two sets of reference books and less than one hundred volumes of miscellaneous reading material, housed in one end of the large study hall. This room is fully as large as the one now used as a library in the senior high school building and, if remodeled and equipped, would provide amply for the needs of the six hundred pupils who will be enrolled next year. The person in charge of this library should be a specialist in this line of work, capable of advising with pupils and teachers regarding the literature in the various subject-matter fields, coordinating the work in the various departments, and teaching the proper use of reference material; she should be a trained librarian.

The program of studies for next year has not as yet reached such point in its development as will permit making any definite statements regarding it. Many changes have already been made; further revisions are contemplated. The statements which follow are in each case qualified by the above and are not to be regarded as final. English, general mathematics, social science, music, and physical education will probably be required of all pupils in the seventh and eighth grades. With the new gymnasium and music facilities the time now given to music and physical education will undoubtedly be increased. Provision will be made whereby each boy during these two years will be offered short (probably nine weeks) exploratory units in at least eight of the following: home carpentry, home electricity, machine shop, automobile mechanics, sheet-metal, printing, mechanical drawing, bookkeeping and stenography, art, and general language. Each girl, in the same manner, will be offered eight of the following: sewing, cooking, home nursing, home decoration and design, textiles, care of electrical appliances, budgeting and marketing, child care, bookkeeping and stenography, art, and general language.

No attempt will be made to furnish vocational training in these exploratory units. Materials of instruction will be carefully chosen which will be of value to all pupils regardless of future vocation. In the units in the practical arts, for example, boys will be taught, among other things, the care and use of the tools commonly used in and about the home: how to build and apply finish to simple articles of furniture; how to put up a shelf, repair a lock, change a tire, read a blueprint, wire a door-bell, solder a joint, glaze a window. By means of materials such as these, in themselves definitely worth while, we will be exploring the boy's interests, aptitudes, and capacities; we will be finding

out not only what he is good for but, of equal importance, what he is not; there will be revealed to him the social and economic possibilities and limitations of the various trades and professions, and the preparation necessary for success in each.

The seventh and eighth grades will be regarded as the "finding" years; differentiation will start in the ninth, the "carrying-on" year. There, the pupil will be given opportunity to continue along the line of endeavor which, as a result of the exploratory courses, he, his parents, and the school are convinced will most likely be of profit to him and to society. It will be possible for him to pursue courses preparing for admission to higher institutions, or immediate entrance into commercial or industrial pursuits. These courses will be so set up that transfer can be made from one to the other with a minimum loss in time and credit.

In this report exclusive emphasis has been placed upon the exploratory function of the junior high school because it is the one with which we are most concerned at the present time. Dr. Strayer emphasized the need in his report last year; the addition now being made to our school will provide special equipment for the satisfaction of this need. Dr. Ketler, Mr. MacLean, the teachers in both senior and junior high school, and the writer are working together on the plans for reorganization which will be placed in operation in September. Many changes will undoubtedly be made before that time—and after. What its final form will be can only be conjectured. One thing, however, is certain;—with all working together the resulting product will be superior in every respect to that which could be achieved by any one man.

Respectfully submitted,
CLARENCE E. AMSTUTZ,
Principal.

Report of Headmaster

To Superintendent Frank C. Ketler:

I herewith submit my eighteenth annual report as Headmaster of the Berlin Senior High School.

REGISTRATION

The total registration for the school year ending June, 1930, was 611 pupils, 305 boys and 306 girls. Table I gives the registration in full. The total enrollment to date for the year 1930-1931 is 691, 361 boys and 330 girls, indicated in full in Table II. Six pupils who left school last year due to sickness and other causes have returned.

The registration of the class of 1934 for the school year 1930-1931 is as follows: from the public schools 141, repeating the year 4, from St. Patrick's School 23, from St. Regis Academy 17, from Angel Guardian School 17, and from outside schools 6 a total of 208 pupils, 105 boys and 103 girls.

98 pupils graduated in June, 1930. During the latter part of the school year 1929-1930, information blanks were filled out by all seniors, stating what they planned to do after graduation in June. From this data, it was found that 34 pupils planned to enter colleges or other institutions of higher learning, and eight to enter hospital training. In the follow-up study of this class in September of the following year, it was found that 27 entered institutions of higher learning, and eight went to hospitals as planned, making a total of 35 out of 42 who carried out their original plans. Table IV gives a full report of the activities of the members of this class since graduation. It will be seen from this table that 45 percent entered colleges and training schools as compared with 36 percent for 1929, 31 percent for 1928, and 37 percent for 1927. There are 148 pupils in the senior class that will graduate in June, 1931.

ORGANIZATION

For the school year 1930-1931 the organization of the school program is as follows: the hours are from 8:30 a. m. to 11:30

a. m., and from 1:00 p. m. to 4:00 p. m. The fourth period in the morning is used for semi-curricula activities and the last period in the afternoon is used for a make up period and also for extra-curricula activities.

PLANS FOR FUTURE DEVELOPMENT

In view of the fact that the senior high school, under the new organization, will have three instead of four classes, and in order to develop and enrich the curricula along modern lines, and also to do away with the pupils going from the main building to the Marston School through all kinds of disagreeable weather, I recommend that the following changes be made.

1. Due to the crowded condition, it becomes necessary to offer typewriting only to those pupils taking the commercial course, and thus not offering an opportunity to those pupils in the other courses who are desirous of electing typewriting. In order to give an opportunity to these pupils, and to take care of the overcrowded condition that now exists in the commercial department, it becomes necessary either to add another typewriting room, which would mean another teacher, or to enlarge the present typewriting room. I have checked the plans and found that it is possible to make one large room by tearing down the partition between rooms 108 and 109. This will furnish a room large enough to add new typewriters to take care of the over-crowded condition in the commercial course, and also offer an opportunity for other pupils to elect this subject. This work could be carried on by the same teacher and would eliminate the very crowded condition that now exists.

2. At the present time the cooking room and the print shop are not suitable places to carry on this work due to the dampness that is always present in these rooms, because they are constructed partly under ground. A great many of the students in these rooms contract colds, and I don't consider it a safe or healthy place for these children to work. The heat that was at one time on the ceiling has been moved to the walls, but even so the dampness still prevails. If we continue to use these rooms, I suggest that this dampness might be eliminated to a large extent by the construction of wooden floors with suitable air space. The sewing room that is now in use, the room adjacent to the library, is not large enough and is not a suitable place for the girls to work, from the standpoints of ventilation, light, and available apparatus. I suggest that in the organization of the

work of the junior high school, that a program be arranged so that when the junior high school classes are in the senior high building using the cooking room, the senior high school girls could use the sewing room in the junior high building.

3. In order to avoid the commotion and ill effect produced by having the students leave the senior high school building to go to the Marston school for drawing, I suggest that the apparatus from the drawing room in the Marston School be moved into Room 101 of the senior high school building.

4. In order to keep up with the progress that is now being made in the training of operators for the different types of calculating machines now in commercial use, I recommend that Room 113, that was converted into a class room last year in order to take care of the crowded condition, now be changed into a room equipped with different types of calculating and duplicating machines. This room will not only afford a proper place for such work, but will give an opportunity for the work to be done without interruption, under the direction of one of the commercial teachers. At the present time, all such duplicating work for the different teachers, and for the school paper has been conducted in room 109 by Miss Dresser, and in some cases the work has more or less interfered with the regular class room procedure. This room can also be used as the headquarters for the pupils doing special work for the school paper.

5. I further recommend that the room now used by the sewing class be turned into, what I might call a work shop for the teachers. At the present time, we have no place where the teachers can work during spare periods, or after school, in the preparation of stencils, lesson plans, new types of examinations, and similar work that has been introduced by modern scientific methods in teaching.

6. At the present time our Mechanic Arts course has not offered any work along electrical lines. This has been not only the great weakness of the work, but a serious handicap to the boys of this department. With a practical knowledge of electricity, a great many boys could very easily fit into local jobs which are now closed to them. I recommend that a man be hired to teach auto mechanics in the senior high school, who is also familiar with the ignition system of the automobile. This same teacher could teach the exploratory work in electricity in the junior high school.

7. I recommend that in order to give more experience to

the students in the print shop that a book binding equipment be added. This will enable the instructor to give a wider range of material to the pupils electing printing in the senior high school.

THE COURSE OF STUDY

There will be practically two courses in the curricula of the senior high school, namely the Latin and the Scientific. The college preparatory curriculum will follow along the traditional lines in order to prepare the student for the college entrance requirements. The scientific curriculum will be a course with few required subjects but very broad in the elective subjects. However, this course will prepare students for work along commercial lines, entrance to the normal schools, entrance to our State University, and most of all, preparation for life.

There will be very little change in the curricula of the senior high school in order to adjust itself to meet the situation and change in the junior high school program. The change in program, with the exploratory work that will be offered to the pupils of the junior high school, along with the vocational and educational guidance given to all, will eliminate to a great extent the misfits in the different courses of the senior high school. In a great many cases, pupils are taking courses in the senior high school for no other reason than that it is the choice of a parent, or because of some friend who is already taking that course. Again we find that in order to do the required work of the different courses, it is necessary for the students to have certain mental ability. Records from our tests show that it is practically impossible for students with intelligence below a certain point to be expected to do standard work in subjects like Latin, Bookkeeping, and Shorthand. From the New York Latin Achievement Test, given to all freshmen last year, it was found that the scores of this test ranged from 28, the lowest, to 169, the highest. This wide range in the distribution of the results indicated that there were eleven pupils who were absolute failures in this subject. All of these eleven pupils have dropped Latin, changed their course, and are now taking subjects for which they have greater aptitude. With proper guidance in the junior high school, this loss of time on the part of the pupils will be eliminated.

In the commercial course, typewriting will be taken up the sophomore and junior years. Bookkeeping will continue as before in the sophomore and junior years. Formerly we have offered shorthand during the sophomore and junior years. This

work has been transferred to the junior and senior years since it will be advantageous to give the pupils active working knowledge, practice, and drill in the subject matter, right up to the time of graduation. This will be of great assistance to those pupils who will begin dictation work in an office immediately after graduation.

During the past few years there has been a request made by the students entering schools of technology, like the Massachusetts Institute of Technology, for an opportunity to study German. This particular school requires this subject for entrance. As we have several teachers who can handle this subject, I believe it will be possible to offer German next year, provided enough pupils elect it to form a class.

A greater opportunity will be offered in the sciences from the seventh grade right through the senior high school. Biology will be offered as an elective in the tenth year, and can be followed by Physics and Chemistry in grades eleven and twelve.

THE SCHOOL OF THE AIR

I wish to call your attention to the possibilities of a centralized radio equipment that is now being placed in a great many of the progressive schools of our country. This modern device enables the school to carry on the following types of program.

1. To receive during the regular school hours educational programs developed by the best teachers available in the different subjects. The following is a typical program now available each week during the school year by those schools that are equipped with the proper receiving apparatus. Monday, political, social, and economic history of the United States, alternating for junior and senior high schools. Tuesday, story telling and music appreciation for the primary and elementary grades. Wednesday, English and American literature for the intermediate grades and junior high school. Thursday, a correlation of the fine arts including music, sculpture, painting, and creative work in geography for junior and senior high schools. Friday, current events for the elementary grades, alternating with vocational guidance for high schools.

2. Using this centralized radio apparatus as a local broadcasting station in itself, it is possible to reproduce through the loud speakers in each room, the best records available in music, music appreciation, and the classical records pertaining to English literature and history.

3. With this same device, it is possible to furnish music for recreational periods during the school day, and also to furnish music for socials and for dancing purposes, thus eliminating the expense incurred by hiring outside orchestras.

4. By having a microphonic contact to the apparatus in the office of the headmaster, it is possible to send out a notice to all rooms in a much shorter time than that now taken by calling up the individual room through the telephone method now in use.

5. Through this device, it is possible for an outside speaker to broadcast an address to the pupils in the different rooms instead of taking the time to call them to the auditorium.

6. Through this electric pick-up device, it is now possible for a school system to organize a teaching program under the direction of the Superintendent of Schools, thus affording an opportunity for the best teachers in the system to give model lessons in the teaching of all subjects to the different rooms concerned. Under this scheme, Mr. R. G. Jones, Superintendent of Schools in Cleveland, Ohio, has worked out an experiment in the teaching of arithmetic by radio in the public schools of Cleveland. His records show an unusual improvement made by the pupils under this system and argues that other subjects may be equally well taught. Musical instruction by this method is quite beyond the experimental stage, especially that applied to Appreciation.

The extent to which educational material is broadcast is indicated by a survey conducted by the office of Education at Washington. This report shows that 77 out of 627 licensed broadcasting stations are owned and operated by educational institutions. Fifty-one of them report a weekly average of eight hours of broadcasting, $2\frac{1}{2}$ hours of which is called strictly educational. 271 commercial stations report a weekly average of 57 hours broadcasting, of which $7\frac{1}{2}$ hours are called educational. The National Broadcasting Company reports that the Damrosch music appreciation hour course in music, now in its second year, is reaching 150,000 schools. The Columbia Broadcasting System is broadcasting an educational program in history, literature, music and art, prepared under the direction of experts headed by Dr. William Bagley of Columbia University. A centralized radio equipment has been installed in the new senior high school building at Claremont, New Hampshire.

The reception of these educational programs from the different broadcasting stations, as explained in topic one, is not under man's control because of the distance from the broadcasting sta-

tions, geographical location, static interference, and the interference caused by "man-made" electrical devices. Concerning this particular phase of the receiving apparatus, I wish to state that scientifically I have demonstrated through home made apparatus that it is possible to receive good daylight reception at Berlin. This reception has been made possible by the installation of a long, high antennæ, so placed as to get above the local noise level, with the aid of a powerful receiving set. With any of the reliable commercial sets that are now on the market, I would predict that it would be possible to receive at least 85% daylight reception. This information is based upon the scientific data that I have already obtained from the home made apparatus now in use at the high school. A commercial set would at least be 50% more efficient than the set which I have constructed.

In my judgment, the possibilities of this modern device is not to be considered from the standpoint of receiving programs from outside broadcasting stations only, but is one that the possibilities for development must be considered from the other five points mentioned, giving an opportunity for the school to work out its own educational self-controlled programs. The Board of Education now has available, figures given to them last Spring by one of the leading companies in America, that have specialized on this type of school apparatus.

COMMERCIAL DEPARTMENT

In a study of the ranks and the number of failures in the commercial department, it was discovered that the percentage of failures was high in the subject of bookkeeping. In order to correct this situation, a special adjustment class in this subject has been formed. Membership in this class was determined by ranks obtained by standard tests given at the beginning of the year. The method used is organized on the basis of individual pupil differences. The amount of work covered depends upon the ability of each member to overcome difficulty of subject matter and language handicap. As fast as the pupils are able to meet certain standards, they are promoted from this class into a class where the normal work is being carried on. In the same manner, pupils meeting with trouble in advanced classes are placed in this adjustment class where they remain until such time as they can do the standard requirements. We are in hopes that this method will eliminate some of the failures.

As a matter of record and interest, I wish to compare the re-

sults obtained in our school with those of another school where a similar scientific study was made in the subject of shorthand. These figures are quoted from the records of a western high school, and were obtained from an article printed in "The American Shorthand Teacher" for October, 1930. Out of a class of 130 students in a beginners' class in shorthand, 27 or approximately 20% completed and passed the course which covered a period of two years. Out of a class of 47 in the Berlin Senior High School, over the same period of two years, in the same subject, 27 or approximately 57% completed and passed the work. I wish to call attention to the fact that in the western high school, the requirements were very flexible, ranging from 80 to 100 words per minute. In the Berlin Senior High School, the speed was 100 words per minute, which is a requirement of the New Hampshire State Department. As the teaching of shorthand to all types of mentality is one of the serious problems that secondary schools today are facing, we are trying to reach all of these students by using the group method of instruction in all our shorthand classes. Under the existing conditions, I believe that Miss Dresser, our shorthand instructor, has done a most excellent piece of work. I believe that a great many of these failures, both in bookkeeping and shorthand, could be eliminated if the pupils could be shown by prognostic tests or try-out courses in the junior high school that the subject matter was not within their range of interest and ability.

The following is a statement of our School Bank, which is under the direction and supervision of Mr. Roberts.

N. H. ROBERTS, Cashier,

PRACTICAL ARTS

I wish to state that the work in the shops of the Practical Arts courses is of high order. In order to inform the public, and to give an opportunity to the parents to see the type of projects that are completed in our shops each year, I have directed the shop men to take pictures of all outstanding projects. These pictures can be placed on file, and can be printed in the city report at your will and pleasure. The shop teachers are also going to construct exhibition cabinets in each shop, in order that a sample of some of the more difficult projects made can be viewed by both the local public and by visitors from other schools. In this way the school officials and general public will be able to compare our work with the sample work that is usually brought to us through outside lecturers, who come to speak to us on similar work. One of the outstanding projects made in our wood shop was a seven-foot slide rule. This was made by the sophomore boys in the mechanic arts department. It is now being used by the mathematics pupils in Room 208 for class room demonstration. This rule is a masterpiece, considered from the wood-working standpoint. The process of cementing celluloid to wood is a secret one, held by commercial makers of slide rules, and thus had to be solved by these boys. This same group of second year students calibrated this rule with all the trigonometric and logarithmic functions, correct to four decimal places. This project is not only a challenge to other progressive secondary schools, but to the advance work accomplished by some of the leading colleges of technology. In the machine shop, the boys have completed projects as follows: gas engine, steam engine, and compressed air engine. Some of these engines are now in practical use. Another outstanding project in this shop has been

the construction of several seven-inch wood working jointers. One of these jointers, at the present time, is being used in the shop of the Portsmouth High School, and another by one of our local contractors. The shop also has produced several bench grinders that are now being used in the different school shops. The shop, also, made fifty name plates for us in the senior high school. This same type of name plate, commercially sells for \$2.50 each, as compared with 45 cents, the actual cost of making the same project in our shop. At the present time, there is being constructed in our shops the apparatus that will be used in our new gymnasium. The linoleum block work, done by the boys in the print shop, will compare with any of the work that I have found in the Providence, Rhode Island, shops, or other exhibitions of similar work that I have seen.

APPRECIATION

I wish to acknowledge in this report the good work done by the student body, and the teachers having charge of the special groups that have produced during the past year programs of worthy mention, as follows: Senior Play under the direction of Miss Fraser, Junior Recital under the direction of Miss Kelly, and Graduation Parts under the direction of Mrs. Ordway.

ASSEMBLIES

Among school men, it is understood that one of the factors that in a large way measures the efficiency of the school, as to the fitting of the individual child for life, is expressed through the type of assembly that is sponsored. We have tried to give the student body various types of assemblies. At the beginning of the year, the assembly program was made up of educational talks given by the different teachers in the school, who told in a most interesting manner their experiences in travel during the summer vacation, both in this country and in Europe. During these talks, the student body learned more about the geography of the world than could actually be learned from books. These talks have a much more pleasing effect on the student body because of the close relation and contact that exists between teacher and pupil. The following is an example of this type of program. Miss Williams, "A Trip to Richmond;" Miss Duthie, "Life in a University in a Foreign Country;" Miss Gilbert, "A Trip Across the Continent;" Mr. Roberts, "Eskimo Life in the Arctic." The majority of our assemblies are sponsored by the different clubs

under the direction of the teachers in charge. In many cases assembly programs have been produced by groups of students, acting upon their own initiative, and taking complete charge of programs and all arrangements. From this type of organization, we get great variety of programs. In all cases the programs are seriously planned, organized, and effort made to produce the best type of program possible. In these assemblies, I have observed the practical application of such subjects as music and dramatics actually applied to a program, whereby the participating group not only obtained the confidence and experience as individuals, but at the same time offered amusement and entertainment to the school as a whole. I don't know of any other activity in school that gives, in such a high degree, to the individual child the thrill of success and develops the social instinct, both from the standpoint of the actor and the audience, than these assembly periods. Since civilization is advanced by growing intelligence, the school as a nucleus must point directions, must in a large measure form cultural tastes. This, we feel we are doing in our literature courses, our music department, and these assembly programs.

HONOR SOCIETIES

The following honor societies have received charters and are now well established as a part of the life of our school: Quill and Scroll, National Honorary Society for High School Journalists; National Honor Society of Secondary Schools; National Athletic Scholarship Society of Secondary Schools; National Thespians, National Dramatic Society for Secondary Schools.

ATHLETICS

This year we are trying out for the first time the teacher-coach type of organization in looking after our interscholastic athletics. This has all been placed under the direction and supervision of a physical director, who has been especially trained for this work. In this new organization, more time and attention will be given to the regular gymnasium period, and the work is required of all pupils in the ninth and tenth grades. The plan has not been working long enough for me to express any opinion as to the type of work done, or the results obtained by this teacher-coach method.

I am submitting a detailed financial report of all the athletic activities for the past year, and for this year to date. This state-

ment of the financial report of the Athletic Association is one of the many practical illustrations of how our School Bank functions in the daily routine of not only this, but all the other organizations of the school. It will be noted that these activities have been supported by the student body and have never received any consideration on the regular school budget. This has meant that it has taken a lot of time and energy on the part of the students and teachers to raise money enough to carry on the program. As a result, it has meant that the other activities of the school have suffered, because most of the time and effort has been used to put over the athletic program. It will be further noted that approximately \$350.00 worth of equipment has been added. This is about the average amount used each year to replace and repair old equipment. In order to carry on this activity more efficiently, and to relieve the student body from this high pressure burden of raising this extra money for equipment, I recommend that the School Board appropriate each year at least \$350.00, to be used in purchasing equipment for all the athletic activities.

SCHOOL YEAR 1929-1930

	Receipts	Payments	Balance	Equipment
Football	\$ 876.40	\$ 680.80	\$195.60	\$ 63.13
Basketball	1,419.40	1,395.46	23.94	86.93
Baseball and Track	92.37	342.09	249.72	35.40
May Festival	54.20	6.91	47.29	
Total	\$2,442.37	\$2,425.26	\$17.11	\$185.46

SCHOOL YEAR 1930-1931

Football	\$ 778.32	\$ 419.20	\$359.12	\$124.49
Basketball to date	229.60	197.35	32.25	45.17
Total	\$1,007.92	\$ 616.55	\$391.37	\$169.66

PRIZES AND TROPHIES WON BY THE SCHOOL DURING THE PAST YEAR

School Paper.

The Meteor, one of the school publications, under the business supervision of Miss Dresser, was awarded second prize in a national contest, sponsored by the Columbia Scholastic Press Association of Columbia University. During past years, the Columbia Scholastic Press Association has at two different times

awarded third place, and at another time honorable mention, to our school magazine. Encouraged by this record, we hope at some time in the future to obtain first place. The essays, book reviews, poetry, and short stories which appear in the Meteor are written under the direction of the English teachers. This gives the students opportunity to benefit very directly by any unusual literary talent we may have among our English teachers. Students are thus stimulated to a more critical interest in technique, as well as the subject matter, that they will encounter in their future magazine reading. This is the eighteenth year the school paper has been in action, a time long enough to determine its practical value to the students from a vocational standpoint. We have data to show that there is a transfer of both interest and training from this activity, not only to college careers but also to life work. We have one case on record which shows a young man who chose this activity during high school attendance, continued it in college, and is now assistant editor of one of the leading magazines of this country.

Bookkeeping.

Eight students have received bronze medals for the first year work in bookkeeping. Eight students have received silver medals for the second year work in bookkeeping. Two students have received gold medals for third year corporation bookkeeping. (This third year work was elective and taken up as extra work by the students, which is very commendable.) In order to obtain these medals, the pupils had to meet high standards as required by the Southwestern Publishing Company of New York City.

Public Speaking Club.

The Public Speaking Club, under the direction of Mrs. Ordway, last year competed in a dramatic contest with the leading schools of New England at Pawtucket, Rhode Island. The money used for the expenses of this trip was raised through the activities of this group. They did not receive a prize, but were honorably mentioned, a fact that is commendable, when one considers that they competed with schools located near cultural centers where the pupils have a greater opportunity of visiting the best in dramatics. While in Pawtucket, Mrs. Ordway found that these schools which competed had as part of their curricula the subject of dramatics, taught by specially trained teachers.

Last year one of our students, Phipps Cole of the Class of 1930, representing the Berlin Senior High School, won first place

in a state wide high school contest held at Concord, New Hampshire under the direction of the State Department of Public Instruction. As a result, this young man represented the State of New Hampshire as candidate in competition with forty-eight other boys from the different states of the Union in the second annual Edison Prize Scholarship Contest, held at West Orange, New Jersey. Although this young man did not win first place in the finals, however, it gave him a wonderful opportunity to come in touch with this select group and also, to have the privilege of coming in contact with such men as Ford, Firestone, and Edison.

The following awards have been received by the students of the typewriting department during the past year.

NEW HAMPSHIRE STATE TYPEWRITING CONTEST

Championship Class

The Hesser Cup.

- 1 Gold medal for first place.
- 1 Silver medal for second place.

Second Year Typist Class

- 1 Silver medal for first place.

First Year Typist Class

- 1 Silver medal for first place.
- 1 Bronze medal for second place.

One Minute Accuracy Contest

- 1 Silver cup.

Underwood and Royal School Awards

- 1 Underwood Expert Typist's Diamond medal (for 108 net words a minute for one-half hour).
- 1 Royal Standard Typewriter (for 86 words).
- 1 Royal Gold Crown (for 86 words).
- 2 Underwood Ruby Accuracy pins (for 80-90 words without error).
- 1 Underwood Ruby pin (for 80-90 words).
- 1 Underwood Pearl Accuracy pin (for 70-80 words without error).
- 1 Underwood Gold Accuracy pin (for 60-70 words without error).
- 1 Underwood Gold pin (for 60-70 words).
- 2 Royal Certificate of Proficiency (for 60 to 70 words).

- 7 Underwood Silver pins (for 50-60 words).
- 6 Royal Gold pins (for 50-60 words).
- 7 Underwood Bronze pins (for 40-50 words).
- 16 Royal Silver pins (for 40-50 words).
- 54 Certificates (for 30-40 words).

ACTIVITIES

In order to successfully carry on an activity program in a school, it is highly essential that the teaching force of the school be made up of teachers skilled in avocations, and interested in work either connected with or not related to their regular class room duties. Today, it is very easy to obtain college graduates of experience, trained in technique of class room procedure, but on the other hand, it is difficult to find teachers who, in addition to their regular class room work, can handle efficiently extra curricula activities. A study of the record of our teachers over a long period of years, indicates that the most valuable teacher to the system has been the one who has been able to carry on, with a high degree of efficiency, extra curricula activities, and who at the same time, is very efficient in the technique of the class room. We have tried out many forms of club activities and are still experimenting with activities in a more or less modified form, where more intensive work is required, and some additional credit given to correlated work with other subject matter. This year in place of the debating club, or what was known as the Forum, we have organized a class that will study formal debating, once a week, under the direction of the teacher interested in this subject. This work will be considered from the standpoint of oral English and the marks obtained will be given to the English teacher who will give each student credit for work achieved. This is elective and open to all students who are especially interested in this type of work. This activity has in mind scholastic rather than social objectives. In order to further develop our activity program and programs with the modern tendencies in secondary school education, and to give an opportunity for development as offered in other schools, it will be necessary that all of our teachers be trained to carry on activity work. Teachers who have spent several years in our system, and who can not adjust themselves to meet the needs and requirements along these lines, after due consideration and trial, should be dropped from the system.

In the organization of the school each year, new clubs are

developed, but it is only the old clubs, under the direction of skilled teachers, that survive and really accomplish worthwhile things. I wish to call your attention to some of the good work done by these older clubs that have been in existence for a great many years. The Latin Club, through its activities, raised money and presented the school, at one of our assemblies, with a beautiful silk banner containing the school seal and the school colors, red and black. The act of this club is commendable from the standpoint of cooperation and united effort in presenting to the school something that will be enjoyed by the school at large. The Commercial Club, through its activities, has each year created a fund that has been used to send its fellow students to the State Typewriting Contest at Laconia. The Mechanic Arts Club, one of the oldest and most active clubs in the school, has developed many projects, but the one that should have worthy mention is "Dads' Night," which is held once each year in the high school building. The fact that this organization brings the fathers from their business and social affairs to visit the school and to join with the boys in their enthusiasm for their work is evidence of its spiritual value. It is one of the most direct means of developing a true comradeship between father, son, and teacher in shared interest in the boys' every day work.

The most progressive educators are becoming aware of the necessity of giving definite attention to the genius and above average student, which are found in small numbers in practically every school. Dr. Strayer, in his talk to the teachers while in Berlin, spoke of the above average student, whom he felt should have his greater capacity developed by special attention from the above average teacher. In referring you to other authorities, may I quote from Woodrow's "Brightness and Dullness in Children," "In the ordinary schoolroom, the superior child obtains far less knowledge and training than he can assimilate, less than he must receive if his abilities are to be exerted to their utmost. The exceptionally bright child is capable of turning to advantage a very great variety of knowledge. His education consequently must be broader than that of the majority. It should include more branches of study and more advanced study of the subjects taught to the average children, extra problems and extra study of special topics." In his article, "The Supernormal Child," *Journal of Educational Psychology*, Stern, one of the ablest of the few scientific students of education for the supernormal child, points out, "By following a very different pace from ordinary classes,

by broadening and deepening the cultural material, by minimizing drill and mechanical aids to memorization, by cultivating especially the habit of independent mental review and assimilation of the subject matter, and by free election within the subjects of instruction, (particularly in the upper classes), the superior capacities of these pupils would be given the possibility of development for which their birth had fitted them. Moreover, by reason of the quite unusual demands made upon them, self-discipline and the spirit of conscientiousness would also be developed in a manner totally impossible for such pupils in the ordinary school, and there would be developed for society a class of leaders equipped with really deeper and broader training." "Dr. Wallin, director of the Psycho-Educational Clinic of the St. Louis Public Schools, asserts that the supernormal child has been, more than any other, neglected." "Dr. Goddard estimates that about four percent of the children in the public schools possess mental ability so superior to the average child as to demand special opportunities in the way of special classes and courses of study for their development." "Groszmann, who points out that at present exceptionally bright children receive less attention than the feeble-minded and defective, though they are infinitely more worth while, estimates that their number is at least equal to the number of abnormals at the lowest end of the scale."

We are doing remedial work for the weakest students in English and mathematics. So, I have placed the highest mentalities in one group which meets once a week to discuss the philosophy and technique of the classics and important trends in modern thought. Of course, this is in addition to their regular English classes which meet every day. There are at least four objectives in this activity which is termed the Classic Study Club. 1. The stimulation minds on the same plane exercise upon each other. This condition keeps everyone thinking to his fullest capacity. 2. The classics and the questions prescribed by the College Entrance Board are taken up and discussed, thus preparing those who are obliged to take College Entrance Examinations. 3. Certain colleges such as Harvard, Yale, Dartmouth admit students from our high school, whose ranks are in the upper quartile, upon certification of the Headmaster. However, admission to these institutions of higher learning does not end the students' problems. They find themselves in classes with students who have been especially prepared at the best private schools such as Exeter and Andover, where the classics are stressed and the in-

dividual developed by the small group discussion method. With this extra instruction and more personal contact with the teacher, our students will be better prepared to compete in the above mentioned situation. 4. However, the public school is to serve all. So, I feel that those of inherent cultural capacity even though financially or otherwise unable to go to college, should have the finest thoughts found in literature and the arts brought to their attention. So, I consider this activity a direction to a life reading course. This work has been placed under the direction of Miss Kelly, a teacher of experience and one skilled in the philosophy and technique of the classics, with an unusually wide reading knowledge of the most important in modern thought.

Next year, when we are relieved of the crowded condition that now exists, it is my expectation to organize, through an auditorium period, several classes in public speaking. This will be an elective course open to all students interested, and required of those students who need remedial work in verbal English. In the past few years, there has been great progress made in silent reading, because of the scientific methods of measuring results. In the development of this particular skill, there has been a tendency on the part of the English teachers to omit, practically from all their work, oral reading. This factor in the teaching of English has been strongly advocated by Opdycke in his recent book, "In the Service of Youth," when he quotes, "Good voice, with the ability to use it with effect, constitutes an invaluable personal and professional and business asset. It is, therefore, a distinctly social and community asset, superior to any other that junior and senior high schools can furnish. **Any** teaching of English that fails to bring home to pupils the practical and social and aesthetic values of good voice, and of distinct and correct speech, sacrifices a primary and fundamental emphasis of appeal that is possible in the teaching of no other subject. Attention should be called again and again to individual men and women who stand out, who have stood out, in community and national life, very largely by virtue of their ability to speak clearly and convincingly. This seems to us to be the fundamental basis upon which the teaching of oral English should be motivated." This work will be placed under the direction of Mrs. Ordway, a teacher who is specially trained and skilled in this type of English work.

I recommend that, in the future, all candidates for high school positions be required to show evidence of being able to take

charge of and direct some activity besides the regular requirement of successful experience as a class room teacher.

TEACHERS' MEETINGS

For the past three years instead of holding regular traditional teachers' meetings, I have gained excellent results by holding round table conferences with small groups interested in the same objectives. In dealing with the traditional type of meeting, it was very hard to provide a type of program that would interest all, and in a great many cases the teachers were bored, and it was hard to hold the interest especially when these meetings came at the end of the school day. By dealing with small groups, all interested in the same subject matter, I have found that the teachers, instead of watching the clock, become so interested that in a great many cases, our meetings, instead of lasting one hour as scheduled, are brought to an end only by the sound of the supper gong. The following is a typical program for the English teachers' group for the first semester of the school year.

1. Results of Thorndike-McCall Tests and Statement of our Problem, Mr. MacLean;
2. Book Review, "Creative Youth," Hughes Mcarns, Miss Kelly;
3. Book Report, "In the Service of Youth," Opdycke, Mrs. Ordway;
4. Method Used in Teaching English to Pupils with English Handicap, Miss Woods;
5. Book Review, "Ways to Teach English," Blaisdell, Miss Flynn;
6. How Much English Grammar, Miss Fraser;
7. Composition Scale, Miss Edgerly;
8. Book Review, "In the Service of Youth," Opdycke, (Teachers' Bulletin), Miss Bartlett;
9. Slovenly Speech, (Teachers' Bulletin), Mrs. Ordway.

These meetings also give an opportunity for the teachers, not only to meet and become acquainted socially but also professionally. It is a place where the young inexperienced teacher can meet teachers of experience, and there obtain information invaluable to their work. Although these meetings mean extra work, for all teachers have taken an active part, the results are commendable and the teachers are to be congratulated for the most excellent programs that they have worked out. At these meetings discussions take place concerning the remedial and adjustment work that is now being conducted in the school. Here, too, policies and plans are formulated, carried back into the class room, tried out, and later the results are brought back again for discussion, and for these results valuable scientific information has been obtained. The type of program usually consists of a

review of modern books in education, pertaining to the subject that the group is interested in, and a great many times these book reviews are published in the teachers' bulletin. These discussions and book reviews are not only scholarly and worthy of mention, but are practical from the standpoint of helping all teachers concerned. At these meetings, teachers also report to their groups the results of their experience in visiting and studying methods used in other schools. This year Mr. Rienert gave a most excellent report to his group, after visiting and making a study of the Lincoln School, The Washington Irving High School, School 69 in the Bronx, and the Horace Mann School, in New York City. Mr. Towers also gave a most excellent report of his experience in visiting sixty mechanic arts departments of fifteen schools in the City of Boston. I am in hopes that out of these meetings will result an opportunity for the development of larger groups, made up of teachers interested in the same subject matter taught from the first grade through the twelfth. In this way, for example, the English teachers of the senior high school will know the work covered and the requirements in English in all the grades throughout the school system.

I don't know of any new project that I have tried in my experience, that has been more gratifying and that has produced such results as those that have been accomplished through these group meetings.

In order to promote and further develop the work already started, and also to encourage the teachers working in these group conferences, I recommend that the School Board create a fund in the school budget to be used to send special teachers doing special work to visit some of our more progressive schools. In this way, a few teachers each year will be able, under the direction and recommendation of the Superintendent of Schools, to visit schools where special work is being conducted. This will give an opportunity for the teachers to gain first hand practical information during the regular working hours of the school. As a result of this type of contact, the teachers will be able to return, inspire their fellow teachers through their group conferences, with scientific thinking which will result in scientific class room teaching. I believe that the practical experience gained in this manner is of more value to the school system and the individual teacher than that gained by the results obtained from the theoretical training received during the summer sessions in the courses that are now usually conducted in some of our leading universities.

VOCATIONAL AND EDUCATIONAL GUIDANCE

In the past, I have tried several types of programs of vocational guidance for those not continuing their education beyond high school, and educational guidance for those planning to enter institutions of higher learning. At first, in dealing with this subject, outside speakers, made up of professional and business men and women of the city, were asked to address the students about their own vocations. An outline of this program will be found in last year's school report. This year the members of the senior class have been divided into four large groups. Each group has been given several talks by the headmaster. These talks have been centered around the subject of how to study occupations, compare them, and become interested in and learn about occupational opportunities and other social problems, that must be considered before one should determine his life work. The main object of these talks is to have the students, while in school, assume some personal responsibility and become interested in some type of vocational work. After these general talks, each group was then divided into homogeneous groups, depending upon individual interests. These homogeneous groups meet with Mr. Rienert, one of the history teachers, who is studying in detail through round table conferences, the continuation of the work started with the headmaster. These round table discussions eventually will develop into individual conferences, whereby each student will finally determine the line of work that he is specially interested in, with full details as to all the information possible to be gathered upon the subject. A personnel card system will be established and designed in order that the school may keep track of and follow up all cases under consideration as to the effect of such training upon the pupils concerned. In the interviews with the guidance teacher, and as a result of the study of the personnel cards, follow up reports after graduation, school records, home records, and other information that will be collected, there will gradually accumulate a list of data that will contain common factors to the majority of the students under consideration. From this data, it will be possible to build up after several years, material that can be given to the different homogeneous groups as orientation courses under the direction of the guidance teacher. I believe that this field is of such importance that a teacher, specially trained for this type of work, should be added to our faculty. This teacher would not only instruct students but act as a supervisor of other members of the faculty who

would later become his assistants in addition to their regular work. One full time instructor could carry on this work in both the senior and junior high schools. One of the outstanding features of the Providence, Rhode Island, school system is the vocational guidance work that is now being done under the direction of Dr. Allen. In Providence and many other progressive school systems, this work has passed through the experimental stage and is now considered of such importance that a group of special trained teachers, working under the direction of a skilled director, devote full time to the subject of vocational and educational guidance.

TESTING

During the past year the following tests have been given to all classes: Buckingham Extension of the Ayres Spelling Scale; The New Stanford Achievement Test in Spelling; The White Latin Test, Forms A, and B; American Council Alpha French Test, Forms A, and B; Thorndike-McCall Reading Scale. The following tests have been given to one or more classes: Monroe Standardized Silent Reading Test; Markham English Vocabulary Test, Form 1; Carlson's Bookkeeping Test; Stenquist Mechanical Aptitude Test, Forms 1 and 2; Wiggly Block for Mechanical Aptitude; Thorndike Test of Word Knowledge; Complete Battery of the Stanford Reading Test; Tressler English Minimum Essentials Test; Iowa Placement Examination for English Training; Haggerty Reading Examination, Sigma 3, Form A. All these tests have been tabulated and graphically represented according to the distribution curve, and are now available for study in the office of the Headmaster. Each year the teachers are using more and more the results of these tests for diagnostic study. As a result of this testing, adjustment classes have been formed where remedial work is now being carried on, the English by Miss Woods and Mrs. Ordway, the fundamentals in arithmetic by Mr. Ames, the remedial work in algebra by Mr. O'Hara. Later on in the year, tests will be given in order to obtain data to find out what has been achieved as a result of this special training.

JUNIOR COLLEGE

At our State University we find each year a large number of students who are dropped because of failure to meet the regular traditional type of college requirements. We have others who become discouraged and drop out of their own accord, because of

their lack of ability to adjust themselves to the methodology and technique of college instruction. This type of student does not come from any one school or any particular section of the State. It is the common experience of the best of both our large and small city high schools to have some of their graduates dropped each year from the different colleges. From my study of the problem over a long period of years, and a knowledge based upon psychological data from each individual case, I believe that this waste of student energy, time, and money could be eliminated to a great degree by the introduction of the Junior College, a continuation school of one or more years following high school graduation, located throughout the State near large centers. Berlin could take care of its own students plus the tuition students from the near-by towns of our North Country. The Junior College has passed through the experimental stage and now through its organization offers opportunities for its most important function of aiding in the articulation between secondary school work and the work of the college. The Junior College makes it possible for the student to remain at least one year longer under the direct home influences, at a very critical time in the life of the adolescent.

The causes for failure may be due to several reasons or combinations of complex factors. Some of the most common are lack of mental ability, no tenacity of purpose, mental laziness, immaturity due to mental acceleration, lack of ability to adjust one's self to college conditions and many others too innumerable to mention.

However, in any case the analysis of the situation is the easiest part of the problem. The most important thing is for each community to have raised above its level of consciousness the danger resulting each year to the different individuals having the misfortune of this type of experience. I have in mind an industrious young man, a graduate of our school, one with average mental ability whose achievement quotient was also normal. This student had an objective, his plan was to work several years, save his money and then enter the University. He did his part and carry out in full his plans. On the other hand, at the University he failed to meet the requirements and was dropped. In this particular case, we are not interested in determining whether the student lacked mental ability to carry on the traditional required work, as now conducted at the University, or

whether it was lack of ability to adjust himself to his new situation, or his lack of adjustment to study habits after several years of mental vacation. The fact remains that this young man not only lost his money, time, and energy, but came home discouraged, "beaten," and with a fully developed inferiority complex that will take several years to overcome. If this young man could have had the advantage of one year in his own community of a Junior College training, at least he could have saved his money and at the end of the year, he could have either made good through the kind, sympathetic subjective influences as a result of coming in contact with teachers with a knowledge of his abilities, or would have understood that this type of book training was not suited to his mental make up, and thus would have avoided the embarrassment of failure. This particular case is illustrative of a number of similar cases. Through the Junior College medium, he could have been developed through the right kind of guidance to take up work at a different type of school, where he could have the advantages of practical shop work with correlated subject matter within his comprehension. This type of work could be offered as part of the curricula of the Junior College, and thus he could receive the training that would make him skilled in any one of the trades. If, on the other hand, this boy could have met the requirements of the State University, he could the following year enter the University in advanced standing, one year older and likewise better fitted to continue his college work.

The time is not far distant when such work will be the common practice of all progressive school systems. A great many parents will agree that their children are too young, in a great many cases, to enter college and take up the responsibilities that are now required in most of our universities. This project should be given full consideration by our local school boards and some kind of a comprehensive program developed, so that when the time arrives for action, each community will be prepared to take care of the situation.

CONCLUSION

In closing, on behalf of the faculty of the school, I wish to express our appreciation for the help and suggestions offered by you. We believe that you have a good school, but further believe that under your leadership and supervision, it will be possible to develop a still better school.

Respectfully submitted,
D. W. MacLEAN,
Headmaster.

Table No. 1—Senior High School Total Registration for School Year 1929-30.

Course		Special	1930	1931	1932	1933	Total	Per cent of whole number of pupils per course

Report of Board of Education

Berlin, N. H., January 31, 1931.

To His Honor, the Mayor, and members of the City Council:

We submit, herewith, the forty-sixth annual report of the Board of Education.

We wish to call your attention to the report of the Superintendent of Schools, and to those of the Headmaster of the Senior High School and of the Principal of the Junior High School, on the building program.

The Board is keenly appreciative of the confidence shown in it by the City Council in making this vitally necessary building and developing program possible.

We also wish especially to thank the School Improvement Building Committee of the City Council for their cooperation and advice.

The Board will make every effort to utilize the new equipment to the best benefit of all school members.

Respectfully submitted,

HILDRETH BROWN,
Chairman, Board of Education.

Report of Municipal Court

Berlin, N. H., January 31, 1931.

To His Honor, the Mayor, and Members of the City Council:

Gentlemen:—I herewith submit my report as Clerk of the Municipal Court for the year ending January 31, 1931.

Amount received from February 1, 1930, to and including January 31, 1931	\$ 14,543.52
Amount paid, fines to State and County, etc.....	2,674.56
	<hr/>
Amount paid to Treasurer.....	\$ 11,868.96

Respectfully submitted,

H. M. MOFFETT,
Clerk of Municipal Court.

Report of City Clerk

To His Honor, the Mayor, and Members of the City Council:

Gentlemen:—I herewith submit my report as City Clerk for the year ending January 31, 1931.

I have collected for the City of Berlin and credited to the appropriate departments the following sums:

Auto licenses	\$ 20,619.87
Dog licenses	931.20
Transfer account (taxi licenses, etc.)	1,191.00
City Hall	190.00
Public Works	6,148.50
City Hall Rest Room and Comfort Station.....	139.30
Fire Department	516.45
Cemetery	579.50
Schools (rent, K. S. Hall).....	105.00
Miscellaneous50
Health Department	21.60
Airport	57.00
Election Expenses	70.00
	<hr/>
	\$ 30,569.92
Paid City Treasurer	\$ 30,569.92

Respectfully submitted,

H. M. MOFFETT,

City Clerk.

Report of Overseer of the Poor

Berlin, N. H., January 31, 1931.

To His Honor, the Mayor, and Members of the City Council:

Gentlemen:—I herewith submit my report as Acting Overseer of the Poor for the year ending January 31, 1931.

This year has been the most expensive year for this department since the incorporation of the City, and unless drastic measures are taken to remedy this situation, the year 1931 will be worse. It is true that the expenditures have reached the sum of \$19,974.83 but it must be remembered that since April 1, 1930, one hundred and fifty-three (153) men (heads of families) through lack of employment, have applied to this department for aid.

Our labor conditions have absorbed about half of the expenditures; our prohibition laws have cost the department about \$3,500.00, therefore, the real paupers' account is between \$7,000.00 and \$8,000.00.

As in the past, this department will have to stand the fire of criticism but such criticism should be based on the laws governing the head of the department and not under the pressure of personal feeling, as oftentimes is the case.

I wish to thank his Honor, the Mayor, the City Council, the City Officials, and the public for the aid given me during the past year.

Respectfully submitted,
JOHN A. LABRIE,
Acting Overseer of the Poor.

Report of City Engineer

Berlin, N. H., January 31, 1931.

To His Honor, the Mayor, and City Council of the City of Berlin:

Gentlemen: I respectfully submit herewith the report of the Engineering Department for the year ending January 31, 1931. The following will be an outline of the work carried on by this Department, as a more complete list is shown in the report of the Commissioner of Public Works.

The routine work of the Department has been carried on as usual, locations have been given for sewers, manholes and catch basins. Cemetery lots have been staked out, lines and grades have been given to those building new homes, house numbers, pole and hydrant locations have been given. These records are on file at City Hall.

Surveys and plans were made for the extension of new streets accepted by the City and have been placed in the highway records.

A survey and plan have been made for the proposed extension of York and Mason Streets. This includes the location of buildings, lot lines, railroad and street lines.

A survey and plan has been made for the proposed extension of Pleasant Street from Exchange Street to Glen Avenue at the foot of Glen Hill. This proposed route extends along Union Street, through the Internatonial Paper Co. yard to the center of Glen Avenue. This plan shows the location of buildings, lot and street lines and the tracks in the International Paper Company's yard.

A contour map has been made for the architect of the High School lot at Pine Street.

The City map has been corrected and retraced. This was made necessary by the rapid change and growth of the outlying districts.

We have made from this corrected map, a book containing about sixty pages showing sections of the entire city, these maps

are of a fifty foot to the inch scale and show all the property and street lines. We will have printed from these sheets, copies for the Board of Assessors and the Water Department.

The above map required considerable surveying and field work, all of which was done by this Department.

A survey has been made and levels taken for the relocation of the main sewer near Mechanic Street to the Glen Crossing. It is proposed to change the location of this sewer from the International Paper Company's yard to a direct route through Green Square.

Many plans have been added to our files during the past year, these plans are always available to the public.

Plans and surveys have been made for several of the City's court cases during the past year.

In closing I wish to thank the Mayor and Council, City Officials and residents of the City of Berlin for their hearty co-operation during the past year.

Respectfully submitted,
FRANCIS L. BRANNEN,
City Engineer.

Report of Park Commissioners

To His Honor, the Mayor, and City Council of the City of Berlin :
Gentlemen :

The chairman of the Playground Committee submits the following report, but would like at this time to thank all people and organizations who so materially aided the committee in making the playgrounds of 1930 their most successful season.

The suggestion of Mr. George F. Lovett that a wading pool be provided on the Y. M. C. A. grounds for the very small boys and girls proved a most timely one and through the cooperation of Mayor McGee and the City Council the wading pool was made. It proved to be one of the most popular features of any ground and it was no unusual sight to see that pool literally crowded with little children and more children on the sides awaiting their chance to get in.

A new playground was opened on the grounds at the King School this year, and was very thoroughly equipped with the best quality of equipment, every piece of which carries a guarantee of five years. While this proved to be an expensive proposition, still the demand for a playground on the East Side was so insistent that it could not be denied and it was deemed an economy to equip it with permanent equipment rather than a cheaper kind which would soon have to be replaced.

We are very grateful to the School Board for resurfacing the grounds at the Brown School. The attendance on these grounds after the resurfacing was accomplished was much greater than it has been in any of the preceding years.

To every one who gave time or money or even displayed an interest in the work we extend our gratitude.

Report of City Playgrounds

To the Park Commissioners of the City of Berlin:

I herewith submit my report for the sixth season of the Berlin Playgrounds opened on July 7th and extended for a period of seven weeks, closing August 22nd.

The playgrounds were sponsored by the following committee:

Mrs. Edmund Sullivan, Chairman.
Mrs. Lynn Cutler
Mrs. L. B. Paine
Mrs. H. N. Hodgdon
Mrs. Maude Barney
Miss Alice Chaffee
Mrs. Mark Twitchell
Mrs. Paul Brown

The playgrounds were under the direction of

Miss Maude D. Monahan, Supervisor.
Miss Madonna McKinley, Brown School Playground.
Miss Mabel McKelvey, Bartlett School Playground.
Miss Zelma Keenan, Marston School Playground.
Miss Marion Duggan, King School Playground.
Mr. Clifford Littlefield, Y. M. C. A. Ground.
Mr. Laurier Brooks, Y. M. C. A. Ground.

All the children of the City of Berlin between the ages of five and sixteen years were eligible to attend these playgrounds, which were open from 9 a. m. to 11:30 a. m., and from 2 p. m. to 4:30 p. m.

Each playground is equipped with a sandbox, teeter boards, swings, game equipment, slides, sewing equipment and basketry materials. During the past season a new playground was opened at the King School on the East Side. The playground was fully equipped and was enjoyed by hundreds of children who visited the grounds daily.

The general program on the grounds is as follows:

9:00 a. m. to 10:30 a. m.—Use of the slide, swings, games

equipment, base ball, volley ball, the instructors playing games with the small children during this hour.

10:00 a. m. to 10:45 a. m.—Folk dancing and tap dancing.

10:45 a. m. to 11:30 a. m.—Toy orchestra, harmonica bands.

2:00 p. m. to 3:00 p. m.—Base ball, volley ball, horseshoe games.

3:00 p. m. to 4:00 p. m.—Singing, story telling, sewing, basketry, soap modeling, art activities, model aircraft and first aid instructions.

The use of the showers on each ground varied daily according to temperature conditions.

The closing features of the playgrounds were the Track Meet, held at the Y. M. C. A. Ground, the Picnic at the City Camping Ground, the Doll Carriage Parade, Sewing Exhibition, Wood-working Exhibition, Basketry Exhibition, and Dance Festival, all of the latter being held at the High School Auditorium.

Prizes were awarded to the three most artistically decorated doll carriages, to the three best exhibits in sewing and the best exhibit in basketry.

From the number of children who visited the grounds daily, it is very evident that they received a great deal of pleasure and benefit both physically and mentally.

I extend my sincere appreciation to the members of the committee and to the instructors of the grounds for their splendid spirit of cooperation, thus enabling me to accomplish the desired results.

Respectfully submitted,
MAUDE D. MONAHAN,
Supervisor.

Public Works Department

Berlin, N. H., January 31, 1931.

To His Honor, the Mayor, and City Council of the City of Berlin:

Gentlemen: I submit to you the report of the Department of Public Works for the year ending January 31, 1931. The work done by the Department this year has been of a permanent nature, very little money has been expended for temporary or cheap construction. The policy of the Department has been to organize the work in such a manner as to provide as much work as possible for the unemployed citizens of the City, as consistent with the general plan of economy.

I am submitting below the general maintenance sheet of the Department, this sheet shows expenditures only.

	1929	1930
Street maintenance	\$44,426.72	\$40,204.83
Sewer maintenance	3,320.20	2,867.99
Road maintenance	451.33	542.83
Stable	3,928.91	3,705.93
Tools and equipment	2,117.61	1,958.05
Incinerator	3,453.10	7,810.70
Garbage	9,426.82	9,288.38
Skating rinks	566.79	871.87
Ashes	3,200.99	3,512.44
Cates Hill	8,184.47	8,300.82
Garage	6,522.65	5,800.38
Patching	4,552.20	5,637.63
Cemetery	1,276.23	858.58
Success Road	138.98	407.27
State road maintenance	4,139.28	2,165.29

NEW EQUIPMENT

The City has purchased the following equipment:

One four-ton Federal dump truck.

Three truck blade plows.

Buick Coach.
Chevrolet Roadster.
Sullivan air compressor.
One pair of horses.

UNEMPLOYMENT

The closing of the International Mills this year was felt very much by this Department. Many of the men thrown out of work were men of large families who had been working part time for small pay. The Committee met, and to relieve this situation they decided that as it was impossible to employ all of these men they would try and give as many as possible a chance to work three days a week. Later on the general depression threw many Brown Company men out of work. Another meeting was called and all of the regular employees were cut to five days a week, thus making an opening for a few more men. We have at present over one hundred and seventy men on the payroll working part time. In addition to this we employ extra help after a snow storm to clear the streets from snow. We employ only married men or young men who are helping to support a large family. The Mayor and Committee have done everything in their power to relieve this critical situation. Many men are still without work at this time, but it is an impossibility for this Department to employ them all. We have tried to take care of the most needy cases.

CONCRETE SEWER PIPE

We made last year about fifteen thousand lineal feet of concrete pipe, sizes 12-inch, 18-inch, 24-inch, which was used for surface and sanitary sewers, also culverts. We make this pipe at a cost much lower than it can be purchased and it keeps a part of our crew busy during the winter months.

EAST SIDE MILAN ROAD

The road leading to the cemeteries and beyond, for a distance of about two miles, has been constructed this year. This work has been done in conjunction with the State Highway Department. This road is classified by the State as a State Aid Road, the State paying one-fifth and the City four-fifths of the construction cost.

CEMETERY

The new cemetery has been regraded and all of the terraces covered with loam and seeded.

CATES HILL

Another section of the Cates Hill road was rebuilt this year with crushed stone and tar. We also relocated a section about one thousand feet long and built a stone base and covered with gravel. In another year we expect to have a hard surface road to the top of the hill. This, along with some culvert and ditch work, will lower the cost of maintenance to a minimum.

GARAGE

The annual painting and repairs of all our equipment has been carried on as usual.

SURFACE DRAINS

An eighteen and twenty-four-inch surface drain has been constructed from Gilbert Street to the Russian Church, a distance of sixteen hundred (1600) feet. This will relieve the residents in that section from damage caused by surface water every spring.

A twenty-four-inch surface drain has been built from the Grand Trunk Railroad up Gerrish Street to First Avenue, a distance of four hundred feet. It is to replace an old stone culvert and a line of twelve-inch pipe which would not take care of the flow and caused considerable damage to the property owners of that section.

A twenty-four-inch surface drain has been built from the river to Goebel Street along Mason Street, a distance of five hundred feet, the Boston & Maine Railroad paying nine hundred and sixty-five dollars (\$965.00) towards the cost of this construction. This drain will be extended to lower Burgess at a later date.

An eighteen-inch drain has been built on Cascade Street and we are now constructing an eighteen-inch drain on Hillside Avenue from Spring Street to Portland Street.

FOURTH AVENUE

The largest single job done by this Department was the construction of a water bound macadam street and two concrete sidewalks on Fourth Avenue, between Hinchey and Madigan Streets. This was an especially difficult and expensive job, due to the differences of grade of the two sides of the street and that the sewer and water pipes had to be lowered, ledge excavated and walls built.

WILLARD STREET

Willard Street, between School and Pine Streets, was scari-

fied, reshaped, rolled and tarred. This was a much needed improvement and was done at a small cost.

ELM STREET

This street was paved and two concrete sidewalks built from Spring Street to the end. This work has made a great improvement to this section.

NORWAY STREET

This street was paved from Seventh Street to Eighth Street and a concrete sidewalk built. This work was very much needed as Norway Street is one of the heavy traffic streets of that section.

COOS STREET

Coos Street was paved to a width of twenty feet from Sullivan Street to Beaudoin and along this street to Forbush Avenue. This will give a hard surface from the center of Forbush Park to the City.

AIRPORT

The grounds and runway at the Municipal Airport have been graded at a small cost. A hangar has been constructed that will house four planes. This layout while not as extensive as some other municipal airports in the State, is adequate for our present needs and is listed by the Department of Commerce as good.

WADING POOL

A wading pool and bath houses have been constructed on the Y. M. C. A. field. The City was well repaid for the small cost of construction, as the smaller children had a place to bathe during the warm days which was safe and sanitary. As many as four hundred children a day took advantage of the pool.

STONE WALLS

Stone walls were built on the following streets: Second Avenue, Hillsboro Street, Guilmette Street, Hillside Avenue, Third Avenue. These walls were all built from stone excavated from streets during the winter months. One of these walls is sixty-five feet long and thirty-five feet high. This type of work was done in the winter to relieve the unemployment situation and served the double purpose of removing ledge from a street and building up a wall to support a street or sidewalk.

CONCRETE STREETS

High Street, between Pleasant and Main Streets, was paved

with concrete. This section of street was narrow and subject to heavy traffic and I feel that the City will be well repaid for the extra cost of this type of construction.

WATER BOUND MACADAM

The following streets were paved with water bound macadam: Elm Street, Coos Street, Merrimac Street, Mason Street, Hillsboro Street, Cascade Street, Fourth Avenue, Strafford Street.

CONCRETE SIDEWALKS

Concrete sidewalks have been built on the following streets: Third Avenue, Cascade Street, Green Street, Fourth Avenue, Jasper Street, Holt Avenue, Church Street, High Street, Madison Avenue, Poplar Street, Elm Street, Brown Avenue, Sdeden Street, Norway Street, Goebel Street, Hillsboro Street, Rockingham Street, Mason Street, Champlain Street, Strafford Street, a total of approximately two miles.

SEWERS

Sewers were laid on the following streets: Sixth Avenue, First Avenue, Fourth Avenue, Mt. Forist Street, Wentworth Avenue, Western Avenue, Fifth Avenue, Labossiere Street, Willard Street, Madison Avenue, Portland Street, First Street, First Avenue, Main Street, Hillside Avenue, and East Milan Road, a total of approximately one and one-half miles. Much of this work was done in conjunction with the Water Department and part of the cost of excavation was paid by them.

The above are only a part of the jobs done in this City. The office and books of the Department are always open to those wishing information not given in this report.

The Mayor and Committee in recommending the work for the last year investigated all conditions thoroughly before ordering any work done, then did recommend the jobs that would serve the public to the best advantage.

The work of the Mayor and Committee on Public Works has been exceptionally strenuous this year on account of the number of investigations required by the numerous petitions, letters and complaints.

In closing I wish to express my thanks to the Mayor, the members of the City Council, and the Committee on Public Works and the residents of the City for their hearty cooperation and

assistance during the past year.

Respectfully submitted,

FRANCIS L. BRANNEN,

Commissioner of Public Works.

PUBLIC WORKS INVENTORY

One gasoline driven roller	\$ 4,625.00
One steam roller (with scarifier)	3,000.00
One stone crusher with bins and engine complete	6,000.00
Ten sidewalk plows	350.00
One gutter plow	25.00

Report of Department of Health

Berlin, N. H., December 31, 1930.

To His Honor, the Mayor, City Council and Members of the Board of Health:

I herewith have the honor to submit the twentieth annual report of the Department of Health, covering the activities for the year ending December 31, 1930.

I desire at this time to extend my sincere gratitude to His Honor, the Mayor, the Committee on Public Health, members of the City Council and members of the Board of Health for their cooperation during the past year.

As a matter of economy a departure is being made this year from the previous method of making an annual report which will be more in the form of tabulations.

SUMMARY OF ACTIVITIES OF THE DEPARTMENT

1. Business methods of conducting the department with complete records.

2. POPULATION: Is the basis of all vital statistics. It is determined by a national census taken every ten years, at the beginning of each decade. Using the United States Census Bureau Figures, the population of the City of Berlin for 1910 was 11,780—1920, 16,104 and 1930—20,018, showing a gradual increase of nearly twenty-five per cent every ten years.

3. DEATH REGISTRATION: There were 188 resident and 26 non-resident deaths, a total of 214 recorded during the past year and death rate per 1000 residents of 9.4. It is of interest to note that 32 per cent of all resident deaths were persons of sixty-five years and over.

4. BIRTH AND STILLBIRTH REGISTRATION: There were 518 living births and 19 stillbirths reported to the City Clerk during the year, giving us a birth-rate of 25.9.

5. COMMUNICABLE DISEASES: There were 162 cases

of communicable diseases reported, which is a definite decrease over the preceding year. Scarlet Fever was in the lead with 85 cases; 12 cases of Diphtheria were reported, for the purpose of stamping out this disease our annual free clinic was held during the month of January, 265 children under twelve years of age received these injections of Diphtheria Toxin Antitoxin. There were no cases of smallpox reported. 526 school children were vaccinated during this year by our Medical Officer. Tuberculosis showed a decrease during the past year, a free clinic conducted by the New Hampshire Tuberculosis Association under the supervision of Dr. Robert Deming is held in our department once a month.

6. INFANT WELFARE: There were 32 deaths of children under one year of age, which, with 518 births gives us an infant mortality of 61.8; 24 infants under one month died during the year or 12.7 percent of the total deaths for the city. Weekly Infant Welfare clinics are held at the City Hall and King School and a monthly Pre-School clinic is held at the City Hall.

7. WATER SUPPLY: The water furnished to the city for drinking purposes during the past year was found to be of fairly good quality.

8. MILK SUPPLY: A close supervision of Berlin's milk supply has been maintained throughout the year, by the examination of dairies, arranging for tuberculin testing of all herds furnishing milk to Berlin, periodic examinations of milk. Three dairies are furnishing over twenty-five hundred quarts of pasteurized milk in this city. We issued 27 milk dealers; 28 milk producers and 83 store dealers licenses during the year.

9. SANITARY INSPECTIONS: The routine inspection of markets, grocery stores, fruit stands, bakeries, restaurants, soda fountains has been carried on in conjunction with the State Sanitary Inspector and found that the proprietors are careful in observing sanitary regulations.

10. BACTERIOLOGICAL LABORATORY: The usual work of the laboratory consists of: The bacteriological and clinical analysis of milk, cream, ice cream and water supplies. The examination of fixed slides for diphtheria and tubercle bacilli, also smears for gonorrheal infections.

11. SCHOOL SUPERVISION: As a matter of control we found it necessary to secure the services of an additional nurse

during the past year for general public health work in the supervision and control of communicable diseases in the schools.

12. PROSECUTIONS: During the year it was necessary to prosecute a case for adulteration of milk.

Respectfully submitted,

E. A. MARCOUX,

Health Officer.

Approved:

J. E. LAROCHELLE, M. D.,

JAMES J. FEENEY,

ELISABETH H. MASON,

Members of the Board of Health.

City Solicitor's Report

Berlin, N. H., January 31, 1931.

To His Honor, the Mayor, and City Council of the City of Berlin:

Herewith I submit my report as Solicitor for the fiscal year ending January 31, 1931.

During the past year several small claims were presented against the City for damages sustained to domestic animals by dogs running around the City. Some of these dogs were unlicensed, and the expense of carrying up the question of the liability of the City was so small that it was considered advisable to adjust in some cases. I might take this opportunity to say that regardless of the amount involved, the City some day should carry the question to the Supreme Court for final determination, and have the question definitely decided. I have always entertained the opinion that where a dog runs around and does damage and there is no proof that he has been duly licensed, in the City of Berlin, that the City is not responsible. Of course there is no question but what the City is liable for damage done by domestic animals when it can be clearly shown that the damage was done by dogs duly licensed in the State of New Hampshire.

There is pending on the equity docket the case of the Hub Cycle and Auto Supply Company and Howard W. Jenkins vs. City of Berlin and A. E. Michaud, Tax Collector. This case was set down for trial on several occasions but the lawyer for the plaintiff lives in Manchester, and the matter probably will be disposed of next term.

September 9, 1929, Amedee Labonte filed a petition against Perley Churchill, Napoleon Ramsey and Julius Stahl, as Police Commissioners of Berlin, claiming that he was unlawfully ousted from his position as police officer of the City.

The case was partly heard before Judge Oakes, and then later before Judge Burke, and after a lengthy hearing the latter Justice found that the Commission had a right to ouste Labonte from the police force. Then arose another case concerning his

right to his salary during the time that he was suspended, which was very nearly a year. The Judge in this case held that Labonte had not been suspended legally, and held that he was entitled to his pay during the time that he was laid off. This case was transferred to the Supreme Court, trip was made and the case was argued during the week of February 2, 1931, before the Supreme Court in Concord, and a decision will undoubtedly be rendered at the March Term.

There is another action pending, growing out of the attempt of the City to lay out a highway on the east side of the river; the plaintiff is Arcadius J. Morin and he seeks to recover damages, among other things, for the failure of the City to lay out the street. Much time has been put in on this case and it will be in order for trial at the April Term of Court.

At the request of the City Council, I also instituted suit against Joseph Kurisko and attached the farm in Bowdoinham, Maine, standing in his name, with the idea that the City might recover some of the money which it has paid out during the last five or six years for the support of Kurisko's family, which amounted to several thousand dollars.

It was necessary to bring this suit in the Maine Court and probably will not come up for trial for some time.

An immense amount of work was done during the spring and summer in connection with revising the city ordinances. This work is now practically completed and ready for binding.

Another important piece of litigation against the City was the case of Mark A. Twitchell where he attempted to recover certain valuable pieces of land which he claims should never have been conveyed to the City, in the deed of the Water Company. Practically a week was consumed in trying this case, and the matter was gone into quite thoroughly. Mr. Twitchell claims that all the land at the foot of Mt. Forist deeded to the City, should go to him. It was indeed a mistake not to have some outside engineer check up at the time of the purchase what land was sold by the Water Company and conveyed to the City of Berlin, then there could have been no mistake or a basis for a suit. This matter is all in the hands of the Court at the present time, and consequently I do not like to make any comment thereon, but I do wish to recommend most strongly that some day the City employ expert engineers to draw up a map and plan for the benefit of the Water Company and the taxpayers so that they may

understand thoroughly what they own.

The preparation and trial of this case occupied nearly a month. Matters in connection with the sale, as the testimony of all of the witnesses show, were so complicated that it was a difficult case to prepare and properly present to the Court. The Water Works was purchased from the Berlin Water Company, Inc., in July, 1925, and nearly five years thereafter the plaintiff brought a suit claiming that all of the land which was deeded to the City in and about the foot of Mt. Forist was an error, and filed proceedings to have the same reconveyed to him.

The case now being before the Court I dislike very much to make any public comment on the matter, but I feel it is my duty to report just what has occurred so that your Honorable Mayor and City Council can understand the situation, although many of the councilmen were witnesses and appreciate what happened.

The Court has not as yet rendered a decision. I do not care to criticize the manner in which the whole affair was handled; that is something for the Mayor and City Council to consider, but it was indeed a mistake in 1925 not to have some qualified engineer check up at that time what the City of Berlin really purchased from the Water Company; had this been done thoroughly and by a competent man the City would have avoided all the expenses of a lawsuit. I do not feel that it is too late now for the City or the Berlin Water Commission to hire some good man to do the work; at least the City will understand what it owns, which is something that the taxpayers are entitled to know.

Another important matter was the endeavor of the Mayor and City Council to have the curve of the Berlin Street Railway near the Planing Mill on Main Street removed. This necessitated a hearing before the Public Service Commission at Concord at which the Mayor and practically all of the Councilmen were present. The City will undoubtedly be successful in the near future in cleaning up this dangerous spot, according to an order of said Commission.

As a whole the work of the City Solicitor during the past year has been quite enormous; not only have the above cases and numerous small ones been attended to, but he has gone to various towns with your Health Officer and prosecuted men who had been shipping milk into the City far below grade.

Numerous cases have been attended to in the Municipal Court; and such contracts as the various department heads have

seen fit to submit to me have been carefully gone over, and approved or disapproved.

In submitting herewith this report it gives me pleasure to express my sincere gratitude to the Honorable Mayor and the individual members of the City Council; both the Mayor and Council have cooperated in every way for the best interests of the City.

Respectfully submitted,

MATTHEW J. RYAN,
City Solicitor.

Report of Tax Collector

Berlin, N. H., January 31, 1931.

To His Honor, the Mayor, and City Council of the City of Berlin:

Gentlemen: I herewith submit my report as Tax Collector for the year ending January 31, 1931, as follows:

Taxes—1930.

Amount committed	\$758,539.52

--	--------------	--------------

Interest collected	\$ 262.86
Poll taxes not committed	622.00
Property taxes not committed	120.55

	\$ 1,005.41	\$ 1,005.41
--	-------------	-------------

Amount paid to Treasurer.....	\$757,508.99
Balance due on stock in trade, Feb. 1, 1931	\$ 1,485.94
Balance due on poll taxes, Feb. 1, 1931.....	550.00

Balance due City Feb. 1, 1931 for year 1930	\$ 2,035.94
---	-------------

Taxes—1929.

Balance due City, Feb. 1, 1930, for year 1929	\$ 1,508.48
Amount collected	\$ 1,186.89
Amount abated.....	29.50

	\$ 1,216.39	\$ 1,216.39
--	-------------	-------------

Interest collected	\$ 21.23
Poll taxes not committed	12.00

	\$ 33.23	\$ 33.23
--	----------	----------

Amount paid to Treasurer.....	\$ 1,249.62
Balance due City, Feb. 1, 1931 for year 1929	\$ 292.09

Taxes—1928.

Balance due City, Feb. 1, 1930, for year 1928	\$	48.00
Amount collected	\$	10.00
Amount abated		4.00

	\$	14.00	\$	14.00
Poll taxes not committed				6.00

Amount paid to Treasurer.....	\$	20.00
Balance due City, Feb. 1, 1931, for year 1928	\$	34.00

Taxes—1927.

Balance due City, Feb. 1, 1930, for year 1927	\$	136.88
Amount collected	\$	117.80
Amount abated		19.08

Amount paid to Treasurer	\$	136.88	\$	136.88
--------------------------------	----	--------	----	--------

Tax Sales.

Amount collected	\$	5,940.95
Interest collected		182.31

Amount paid to Treasurer.....	\$	6,123.26	\$	6,123.26
-------------------------------	----	----------	----	----------

Taxes.

Year	Uncollected
1925	\$ 1,411.60
1924	603.40
1923	1,536.41
1922	621.36
1921	471.02

The collection of taxes in general has been very hard. The payment of taxes on stock in trade has been better than could be expected and the merchants can be commended for their efforts to meet that obligation.

The balance outstanding is a little more than last year but the commitment exceeded that of 1929 by \$20,000.00 and the labor conditions in the City were the worst that have been experienced within the past three decades. With all these hard circumstances to cope with, it is well to note that the abatements granted the Tax Collector by the Board of Assessors, regardless of prevailing conditions, have been less than in 1929 by \$300.00. It should also be noted that about \$200.00 in abatements have been given the

poor people of the City, which amount seems very small if compared with the \$65,000.00 expended for relief by the City and County jointly.

The amount of outstanding taxes now presented is not as low as it might have been if conditions had been normal, but if it has reached the present figures, it is not through favors but through efforts to collect that which is expected by the citizens.

There are always opportunities to better one's department at the expense of another and it is also recognized that the only thing a Tax Collector can depend upon is cooperation and sometimes that cooperation fails.

Respectfully submitted,
JOHN A. LABRIE,
Tax Collector.

Report of City Treasurer

Berlin, N. H., January 31, 1931.

To His Honor, the Mayor, and City Council of the City of Berlin:

Financial Reports

Municipal Regulations

FOR THE PAYMENT OF ALL BILLS AGAINST THE CITY

All bills against the City must be approved by the person authorizing the charges, unless this is done no action can be taken upon the bill by the Committee on Accounts and Claims, and no order will be given for its payment. When bills are certified as to above, and left with the City Clerk not later than 12 m., on the Saturday preceding the first Tuesday of each month, they will be audited by the Committee on Accounts and Claims and if approved by them and allowed by the Council, will be ready for payment on the following Thursday at the office of the City Treasurer.

Meetings of the Committee on Accounts and Claims are held on Monday of each week, and the regular meetings of the City Council are held the first Tuesday of each month at 8 o'clock p.m.

Sixth Annual Report
OF THE
WATER WORKS
OF THE
CITY OF BERLIN, N. H.

FOR THE YEAR ENDING
December 31, 1930

Berlin Water Board

Chairman

GEORGE F. LOVETT

Clerk

JOHN J. O'CONNELL

MEMBERS OF THE BOARD

E. R. B. McGee, Mayor, Ex-officio.

John J. O'Connell.....Term expires 1934

Otto J. A. Dahl.....Term expires 1933

George F. Lovett.....Term expires 1932

Henry G. Gosselin.....Term expires 1931

Wallace Graves, Superintendent

Ernest E. Tankard, Assistant Superintendent

A. L. Sylvestre, Cashier

Report of Water Commissioners

To His Honor, the Mayor, and City Council of the City of Berlin:
Gentlemen:

We beg to submit the sixth annual report of the Water Department.

The activities of this Department during the past year have been mainly toward betterments and alterations in the fire protection mains, and work already completed and under way has shown its good in the tendency of lower insurance rates and better terms in fire insurance policies throughout the city.

The most important installation was the linking up of the west and east sides of the City by means of a twelve-inch diameter main, via the Y. M. C. A. bridge. Another much needed tie-up was in the section between Third Avenue and Green Square, and at the present writing, this work is about one-third completed and will be finished in the early spring.

The Ramsey Hill section heretofore has been supplied, both for fire and domestic use, by means of a booster-pump. This pump has been discontinued and this section is now being fed by gravity, thus affording better service. The pump will be held in reserve for emergency use.

Arrangements are now being made whereby the City is to take over the Guy Fortier System, supplying about seventy houses on the East Side. This system was formerly known as the Forbush Water Works.

We would refer you to the City Auditor's Report for financial statement and to our Superintendent's Report for other activities.

We wish to express our appreciation to your Honorable Body

for consideration and help rendered in carrying on the work of this Department.

Respectfully submitted,

EDWARD R. B. McGEE, Mayor,
Member Ex-Officio

GEORGE F. LOVETT, Chairman,
JOHN J. O'CONNELL, Clerk,
OTTO J. A. DAHL, Commissioner,
HENRY G. GOSSELIN, Commissioner.

Report of Superintendent

To the Honorable Board of Water Commissioners:

Gentlemen:

I have the honor to submit herewith the sixth annual report of the Water Department for the year ending December 31, 1930.

The department has laid 21,486 feet of mains of sizes ranging from 2-inch to 12-inches in diameter.

The number of new services installed this year is fifty-seven, considerably less than the average. Sixty-seven old services were relaid during the year, about thirty percent more than last year.

Seven meters have been installed on new services and ninety-two changed, making a total of 459 metered services, which means that about sixteen percent of the total number of services are now on meter. Ten new hydrants have been placed during the year by the department.

The ordinary work of pipe extensions on granted petitions has been performed as usual, although to a smaller extent than the average, owing to a lesser demand for such extensions.

The bulk of our work this year has been to gridiron the different sections of the City together, and follow as near as possible the plan laid out for us by the National Board of Fire Underwriters in 1925.

During the past two or three years, we have experienced considerable trouble from our line which supplies water to Cascade. This line extends for several hundred feet through the so-called Hodgdon Wood Yards, under wood and coal sheds, wood piles, etc., and is continually settling and causing leaks. This condition is not only inconvenient to the customers but would be a very dangerous predicament in case of fire. At the present time work is being done to remedy this condition which we estimate will cost in the vicinity of \$15,000.

Our Main Street extension between High and Third Streets

has been started this year and 750 feet of 12-inch cast iron pipe laid. We hope within the next few years to complete the above hook up.

Work on the basin of our Godfrey reservoir was resumed this year, which consisted of removing 14,000 cubic yards of mud, stumps, etc., leaving a bottom of sand and rocks. The present capacity of the reservoir is 5,400,000 gallons of water and covers an area of $2\frac{1}{2}$ acres. Since completion of the dam in 1927, our storage has been increased from $1\frac{1}{2}$ million gallons to the above capacity. If our finances permit, we are in hopes to remove about 8,000 cubic yards more next year. \$6,000 dollars was expended on the project this year, which has been money well invested as proven by analysis of the water as made by the State Board of Health laboratories in Concord, N. H.

During the past few years we have had considerable trouble with our 12-inch wooden transmission main which crosses the so-called "Dummer Yards" on the East side of the river. This line was installed some 14 years ago, which at that time was a wilderness. Mountains of coal, lumber piles, etc., are now covering the line. Examination made of this line at several points has shown that the line should be replaced. A number of hydrants are supplied from this line and valuable property surrounds the section. We are in hopes to relay about 500 feet of the said line with cast iron pipe next year.

In conclusion, I wish to express my appreciation to His Honor, the Mayor, and Board of Water Commissioners for the hearty cooperation given in performing the duties of the Department during the year.

Respectfully submitted,

WALLACE GRAVES,

Superintendent.

SUMMARY OF STATISTICS
For the Year Ending December 31, 1930
BERLIN WATER WORKS

Coos County, N. H.

General Statistics

Population as of January 1, 1931—20,018.

Date of construction—Main construction, 1892.

Source of supply—Bean and Horn Brooks, Ammonoosuc River.

Mode of supply—Gravity, two emergency pumps located in industrial plants.

Statistics Relating to Distribution System

1. Kind of pipe—Cast iron, wrought iron, copper and wooden stave.
2. Sizes—2 to 16-inch.
3. Extended during year—21,166 feet.
4. Total now in use—42 miles.
5. Length of pipe less than 4-inch—16 miles.
6. Number of hydrants during the year—10.
7. Number of public hydrants—167.
8. Number of private hydrants—98.
9. Number of stop gates added for year—20.
10. Number of stop gates now in use—429.
11. Number of stop gates smaller than 4-inch—204.
12. Range of pressure in mains—30 to 150 pounds.

Statistics Relating to Services, Meters, Etc.

Services

1. Kind of pipe—Cast iron, wrought iron, steel, brass, and copper.
2. Sizes— $3\frac{1}{4}$ -inch to 6-inch.
3. Added for the year—57.
4. Total services now in use—2,639.

Meters

5. Number of meters added for year—7.
6. Number of meters now in use—459.
7. Percentage of services metered—16.

Pumping Statistics

Emergency pump at Brown Company Filter Plant.

Manufactured by D'Olier Centrifugal Pump & Machine Co.

Description—2-stage, centrifugal. Capacity—2,160,000 gallons per 24 hours.

Booster Pumps

1. Location—Corner of Guilmette and Spring Streets.
Manufactured by the DeLaval Steam Turbine Company.
-

Description—Two single stage centrifugal pumps in series. Pumps from the distribution system into a 40,000-gallon storage tank on Hillside Avenue. (Pump to be used only in an emergency.)

2. Location—Near junction of Kent Street and Forbush Avenue. Manufactured by the DeLaval Steam Turbine Company.

Description—Single stage centrifugal. Direct connected to the distribution mains. Pumps into a 20,000-gallon tank on Forbush Avenue.

Emergency Purification Equipment

Two Wallace & Tiernan Chlorinators.

1. One located at Brown Company Filter Plant.
2. One located at Regulator house, Ammonoosuc.

One 18-inch pipe wrench.
Four 14-inch pipe wrenches.
One 24-inch monkey wrench.
One set chain tongs.
One hydrant pump.
One meter testing outfit.

Auditor's Report on Waterworks

Berlin, N. H., January 12, 1931.

Board of Water Commissioners,
Berlin, New Hampshire.

Gentlemen: I beg to submit herewith, the annual report of the Berlin Water Works, as a result of an examination of its books and records for the year ended December 31, 1930.

The balance sheet at the beginning of the period under review was examined and proven with the books. All cash received for this period was traced to the bank and duly accounted for, as well as the examination of all cancelled checks and supporting vouchers to verify all disbursements for the same period. The petty cash was personally counted January 9th, starting date of audit, and a reconciliation made with the bank as of that date, to prove cash in bank which was found correct.

The cash book, trial balance and all books or original entries were footed and a detail verification made of postings, all of which were found correct. The duly authorized abatements were examined and accounted for.

The amount of the outstanding accounts receivable, unpaid, as shown in General Ledger Controls and indicated in trial balance, December 31, 1930, was traced back to the customers card ledgers supporting same and found to be correct.

The accounting procedure is well founded and well conducted. The attached exhibits reflect the financial status of the Berlin Water Works as of December 31, 1930.

Exhibit A—Balance Sheet.

Exhibit B—Statement of Income and Expense.

Respectfully submitted,

W. A. NOONAN,

City Auditor.

Report of Finance Committee

To the Honorable City Council, City of Berlin, N. H.:

Gentlemen:

The Committee on Finance herewith submits its financial report for the fiscal year ending January 31, 1931.

The books, accounts, vouchers and records have been carefully examined by the City Auditor, whose report will be found elsewhere in this volume.

After the books were closed we found that we had a balance of \$241,618.73 cash on hand which included \$62,552.52 unexpended school bond money, leaving a net balance of \$179,066.21 actual cash on hand of the yearly budget. This, we believe, to be a splendid showing due to the fact that with the International Paper Company's plant closing down in March, 1930, putting approximately three hundred men out of employment, the City was obliged to put many of them to work. Also many others who were out of employment both during the summer and winter months. By so doing it helped these men and their families, the merchants and business in general throughout the City.

The success of the past administration is due to the cooperation of the different departments with the City Council.

We recommend the following appropriations for the next fiscal year to defray the expenses of the various departments of the City:

Band concerts	\$ 500.00
Board of Health	7,500.00
Berlin Child Hygiene Association	300.00
Bonds	75,000.00
Cemetery	700.00
City Hall	9,000.00
City Poor	10,000.00
County tax	53,913.55
Election expenses	1,500.00

Fire Department	50,000.00
Forest Fires	100.00
Grand Army	100.00
Hydrants	8,500.00
Interest	40,000.00
Library	9,000.00
Lighting Streets	18,500.00
Miscellaneous	8,000.00
Parks and Playgrounds	1,800.00
Police Department	40,000.00
Printing and Stationery	5,000.00
Public Works Department	130,000.00
Salaries	18,000.00
Schools	200,000.00
State tax	51,807.60

Respectfully submitted,
EDWARD R. B. McGEE, Mayor,
J. ARTHUR SULLIVAN,
B. J. RUMNEY,
Committee on Finance.

Auditor's Report

Honorable Mayor and City Council,
Berlin, New Hampshire.

Gentlemen:

I beg to submit herewith the Financial Statement of the City of Berlin for the year ended January 31, 1931, as a result of an examination of its books and records. The scope of this examination included the City Clerk, Clerk of the Municipal Court, Treasurer, Assessors and Tax Collectors accounts for the period under review. The following exhibits are appended:

Exhibit A Balance Sheet.

Exhibit B Statement of Cash Receipts and Disbursements.

Exhibit C Statement of Budget Control.

CITY CLERK'S ACCOUNT

Receipts for the Year Ended January 31, 1931

Automobile licenses	\$ 20,619.87
Dog licenses	931.20
Transfer account	1,191.00
City Hall	190.00
Public Works	6,148.50
City Hall Rest Room and Comfort Station	139.30
Fire Department	516.45
Cemetery	579.50
Schools	105.00
Miscellaneous50
Health Department	21.60
Airport	57.00
Election expenses	70.00

\$ 30,569.92

An examination of the City Clerk's books and records was made as to sources of all revenue received of whatever nature, and the cash received therefrom duly accounted for. The auto

registrations, dog licenses, taxi, truck and theatre licenses were examined to prove the receipts from these sources and were found correct.

The total receipts from the City Clerk as above listed were paid to the Treasurer, all of which were duly accounted for by him and credited to the respective departmental accounts.

CLERK OF THE MUNICIPAL COURT

Total receipts for the year ended January 31, 1931	\$ 14,543.52
Disbursements per vouchers	2,674.56
Net revenue	\$ 11,868.96

The Court Cash Book was examined and footed and checked against the criminal docket as to all receipts, the expenses checked against vouchers all of which were found in order. The net revenue as above listed was paid to Treasurer and duly accounted for by him and credited to the Police Department.

CITY TREASURER'S ACCOUNT

The Cash Receipts and Disbursements as shown in Exhibit B were examined in detail and all cash accounted for and traced to the bank. Disbursements compared with supporting vouchers as approved for payment and authorized by City Council. The Treasurer's Cash Book was footed and all posting to the General Ledger were proven. The balance of cash on hand January 31, 1931, as shown by the Treasurer's Cash Account was \$241,618.73.

CASH—\$241,618.73

The above Cash Balance was examined and verified by reconciliation with the City National Bank and Berlin National Bank as follows:

City National Bank, Balance per Bank Statement Jan.	
31, 1931	\$121,568.31
Less Outstanding Checks	8,089.89
	<hr/>
	\$113,478.42

To this should be added:

COMMENTS

Unpaid Payroll \$1,176.09.

This amount in the Ledger represents accrued wages of employees not called for by them and after due time the money is returned to the City Treasurer for use and credited as above.

The Tax Collector is to be again commended in the excellent result he has accomplished in the collection of taxes during the year. I appreciate the Mayor and Council may have in mind further liquidation of the old back taxes 1921 to 1928 inclusive and may I again refer to the subject matter asking for a final adjustment of these taxes next year.

While we all appreciate the general depression that has taken place all over the country in all lines, the City as a whole has not been so badly affected when we consider the charge to the City Debt of only \$18,914.67.

In conclusion I wish to express my appreciation of the many courtesies extended during my engagement.

Very respectfully,

W. A. NOONAN,
City Auditor.
